

## Student Dignity (scapegoat)

**Inventor:** God / Satan  
**Year:** ~1200  
v. lat.: students "striving (after), interested (for, striving for)" plural: booze-up. **Socrates** (468 - 399 BC) "Once you start believing you are, you've stopped becoming" / maybe low self esteem driven because of Parents abused their power against their kids => the student has often to work for free, if he invents something great, often older takes it and sell it, and not even give credit instead they intimidate him with non-students or student haters (induced) so that he forgets about the thing he has invented, discovered or made public already.  
Other Use Cases: Cleaning (woman, firefighter, work with dirty chemicals for cleaning up after a fire, older generation abuse the low self esteem they caused themselves students good & brave students

## INK BLOT TEST FIXATION

**Inventor:** Hermann Rorschach  
**Year:** ~1900  
SoLd as a "phantasy" test with formless blobs for children, normal adults and for mentally ill", in fact it distracts the questioned (fixation) so he not focuses to much on the questions. A Hack would be to add an eq. RFID or LC circuit on the backside of the paper and to activate small Active Denial Systems or Hum Noises or treble Sounds around 15000Hz below the conscious perception threshold to let the questioned act as a lar since his face would show stress because of the active denial system that was activated. Using an inkblot test als Lie detector would therefore fail in some cases.

## 3D model of victims body

**Inventor:** XXXXX  
**Year:** ~????  
Like the m98 Card they seem to have also a 3D model of my body, most likely generated from a RetinaCCD (eye1) and they also add eventtriggers (t14) that then eg activates electronic psychological warfare, eg chains like c06 => m32 => m94 => m44 => m93. Not yet found out how to workaround that problem, i will update this card when i found out, and maybe make some videos to explain.  
This card seems to have several DEFCON Level  
If i say: "HansJürg now asked his mummy for help" the algorithm gets more worse, additionally it seems that the System Project then gives out more informations about the complete domin model of the alledged infiltration of switzerland, maybe to obfuscate the 1940s neurology classes? \*Chemtrote gesicht\* \*cd10-f44x\* <-

## Mental Operations

**Inventor:** XXXXX  
**Year:** ~????  
Mental operations are operations that affect mental contents, initially, operations of reasoning have been the object of logic alone. Pierre Janet was one of the first to use the concept in psychology. Mental operations have been investigated at a developmental level by Jean Piaget, and from a psychometric perspective by J. P. Guilford. There is also a cognitive approach to the subject, as well as a systems view of it. **Developmental view:** Seriation, Transitivity, Classification, Decentering, Reversibility, Conservation. **Psychometric view:** Operations dimension, Content dimension, Product dimension, **Cognitive view** ...., **Systems view**....

## Algorithms for Automated Psychological Warfare

**Inventor:** Main Bot der Kombattant, PART2 https://media.ccc.de/v/31c3-6184-de\_de\_9-201412271715-mein-bot-der-kombattant\_-joch\_-arche000\_. There are algorithms, that create psychological warfare "Stories" based on Bigdata and are transmitted over eg. Neuralink or Us4877027. For example if I Google "Ian Murdoch suicide", **pedophilia**. With Systems or Amygdala implants makes me aggressive or drive me to commit suicide attempt. "Successful therapy" would mean that would i break the promise i gave her, Combined with or without **Metulla Spinals Implant hack**. This algorithms seems to creates as much hate in the country/society occupied as imaginable => corrigere!

## fear detection

**Inventor:** XXXXX  
**Year:** ~????  
with Neurosky MindWave you can read attenuation or meditation, so we guess one electrode (t1) card would be sufficient to extrapolate for example also the fear. And if they would show something like cAPI Card on e.g. Facebook stream and would find out that the victim gets paranoid or fears that, they would loop such scenes until the victim to commit suicide or runs away. So this card would be an important element for eg. hol or a16 card, since the offender does not only want to own or kill the victim, the group would feel good when the **victim is revictimized**, so the real offender would play m37 card on the group for later using the d11 card against the group, normally if you could prove that to the offender he says something like "its just training", "we only want to hel" and a lot similar lies, so question is that to the offender says "it's just training" combined with m34. Workaround: Listen to music you love, i use wireless headphones to not disturb my neighbors, i guess the music makes it harder for detection algorithms to identify emotions.

## nightly erase of relevant information(s) (global loop on Neuralink

**Inventor:** XXXXX  
**Year:** ~????  
IMHO there is a nighly (maybe global [generic] personalized) algorithm, that deletes relevant informations like sentences [1] from @ierror from the mind of people or at least from my mind. Prerequisites would be lots of data about persons live, something like Siemoneiver / Neuralink / US4877027 and specific algorithm that would eg. show an image / stimulus on Neuralink for the scene they would like to delete and causing pain at the same time eg. with b1 Card... If true and one could record what they try to delete we would maybe then know how more how they manipulate the world. Yet another Nash Equilibrium... [1] Basically the NSA (Marj: AND CIA), and if they were able to spy on you (Marj: bidirectional, and if they have 10 different options for spying on you that you know about, they have 13 ways of doing it and they do all 13. (Marj: at the same time)

## Intimidating Touring Complete Victim

**Inventor:** ????  
**Year:** ~????  
One could create a touring complete avatar of the victim or the scapegoat and every time if the jury or his social system would listen to him and believe him that he is just the scapegoat the touring complete avatar would start to intimidate the jury or the social system so that the group would stop listen to the victim and think of him as accused or the offender. Technically it would be samples of earlier scenes when the victim was tortured and he said things he maybe just repeated (rawhammer attack of the mind).
