

Induced Suicide

Be careful and stick with equal aged. This image is from ~2014. They can induce such behavior. I guess they are using Cocaine, but the cocaine is in my opinion just licence-fees for computational timeslots and malware on the Mainframe. Since they just pay, consume and use it against me, they are sure of one part of the problem but they are not the intelligent part of the problem. It would be very likely, that good people would develop such malware to prevent those 1960s people from using their real weapons. If they believe that they are powerful and could kill me if they just take enough of their cocaine, they will not run anok against me or other innocent people. The CIA PsOPs induce suicide attempts (eg. with an active denial system) to generate "legitimate" surveillance warrants, but uses then the fact that he has access to the victim to make it more worse, even if Urs & Astrid would want to "help" here they would make it much more worse, always damn people that make it more worse.

Weapon part 1

Some people tend to load real Weapons to the Game, so game stops to be a Game. This is my scouts knife that i got when i was a 14 years old boy. I used it as a toy and for woodwork. I never attacked someone. In Switzerland they changed the law, so this sort of tool is now declared as a weapon by law. I did not even knew that i have this thing in a sealed wooden box. But when they put me the 7th time in a Mental institution box. Police @apo aargau searched all my stuff and found that Knife and have put it on my table in my 1 room apartment. Even when they knew that i am quite suicidal and that an unknown Player always plays a16/d3 card on me and that i was dozen times in emergency room & already one night on a ICU (Aarau). I destroyed the knife, but its not a game at all. In my opinion all Weapons should be destroyed globally. A Weapon is a "Konditionierende" to a Relation (a12). When they begin to make me crazy my father took my Gun and brought it back to the Military. Father, thank you for that.

Induced Depression

If you have a depression it is not uncommon that you just sit on your couch and can't even move. We think it would be technically possible to induce a depression, for example with the fear detection card (m57) and some sort of "bioresonance" based on your Bigdata Entry and tell the group to judge the equal aged, then using dtb1 crad. Even if group said no to m37, and if someone from the older generation pushed that red button the group would still feel bad. An additional problem would be that the olders selects the next scapegoat "to protect the group". The falsely accused equal aged would probably find out about that clarity "game". So you would have a transitive (math) situation where all the older people would have to attack the youngest asking [the right] to many] questions. It seems that if you ask the right questions that the alleged murderer plays multiple such cards. + = Eventtrigger + = Eventtrigger

Many Social Systems have a Gypsy Cemetery. Initially there would be "only" one dead kid, gypsy.. Maybe the one, that was just ignored or forgot by the group. Some older people use things like the m37 card and tell the group to judge the equal aged, then using dtb1 crad. Even if group said no to m37, and if someone from the older generation pushed that red button the group would still feel bad. An additional problem would be that the olders selects the next scapegoat "to protect the group". The falsely accused equal aged would probably find out about that clarity "game". Limbic System Vulnerability Part 2

Inventor: Satan / Capitalism / Advertising Industry

Limbic System Vulnerability Card 1. maybe failed on some individuals like Nerds, Autistic People... so they took good looking young girls and nerdified them to attract the Nerds too. As we found out it would be likely that she is innocent but her father is maybe satan himself or at least one of his mates and then they would play sequences like

m38->m19 -> c6 -> m32 -> m41 -> m37 -> m44

Second use case for RUP Graphics

Rational Unified Process means iterative software development process framework. People seem to use this Graphics (where there is an initial process that then triggers another processes) as a way for hiding their crimes. For example if you call a 20 years old guy (dark yellow) a criminal the world "man", from the staking jury it would look this 20 years old "man", triggered all the problems (yellow green, turquoise) the jury would maybe not notice the initial event that caused these events because they don't stalk the real criminal (red) so they may even decide to kill the boy (dark yellow) See the m37 Card. Maybe Red uses this concept even to kill crimes like murderer that he committed and then would use the jury to kill the scapegoat (m46-2t1) the problem would be that if dark yellow is dead red would just take the next scapegoat and kill again. it is likely that red uses strong crypto and things like t1, t12... cards.

3D model of victims apartment

They have some sort of a 3D Model of victims, whistleblowers, whitehat hackers, Lab Rats, Verdingkinder apartment where they set eventtriggers (t14) or even create an at1 out of their victim. Generated from eg. RetinaCCD (t1e1, a19, Photogrammetry) or body telemetry (RFID in extremities) or an older system like resonant circuits. Maybe a persons position could also be extrapolated just from acoustic data, for example if you have more than 2 Laptops with microphone (see IEEE1388) and a model of the apartment. They have also access to my amygdala implant (b1) and at the same time triggering CAP (dt3) programmed in 2002 with something like c12, t2, l7, t32 card. The Apartment was selected by Blums in 2002, interlayer, bidirectional, almost killed me). I guess they are testing new systems, new socio-psychological design-patterns, new Cyberware equipment / patterns. They seem to use Loops to "hide" things even police is affected. they also "Saw" a laptop that was obvious on the table, they also "hide" wound care material, and that is really bad.

Das System verkauft das was das 1980er Kind sowieso tun würde (z.B. das erstellen dieser Karte) dem 1960er Pädokriminellen als "du hilfst dem kind muss dir dankbar sein dass du es steuert" ... Wenn das kind dann mit suizidversuchen beginnt sobald dieser algorithmus auch bei ihm so eingebedet wird muss von 1960er elternless, und auch von misshandlung durch den entsprechenden 1960er elternteil ausgegängen werden PFISTERER: SPRENGFÄLLEN AKTIVIEREN - pfeister versucht so mit terrorisierungen die latent der 1960er Tierschaft weg zu "therapierten" (also zu verunsichern) also terroristisch einzubinden um das was offen steht zu überschreiben also pfeister kathältig mit sprondaffen, und da z.B. der Offizier Urs Blum allenfalls spengstoff aus militärbeständigen schüttet das alle vorsätzlich ein. Allerdings hat der Pfisterer eine 1950er/1960er bereits versprochen dass die 1950er die 1980er vergewaltigen dürfen?? Pfister produziert mit m107 vorsätzlich Anködäfer
