

## doctor's dignity (דוקטור דיניטי)

m6

<https://0x8.ch/HackersCardgame5>

Inventor: **Pope Honorius III** Year: ~1219

After the classic course through the gymnasium (in > 5 years) and about 10 years in a random university, one gets maybe a master's degree or a doctor's dignity. Requirements seems to be at least some random doctoral thesis in the field of study, and in Computer Science maybe Rank 50 in Battlefield BC2 is also required but unsure which of both is essential... (me mues die Rossi clöpfie wo zied)

Well-functioning RUST™-BOTs / Zombis serving Satan and who are normally sitting on the right side of the eg. in the chest implant is activated.

- Neighbour knocks on wall & at the same time pain in the eg. in the chest implant is activated.
- induced rage card, eg. if you use electronic device
- loop recorder { do something else }
- loop recorder { begin with the first, no the second ... }
- pain frontal lobe enables
- go through all register cards in browser!!!!!! (a17 card)
- drink something / eat something / smoke (smoke1 card)

-> so maybe it would make sense to work on the notes...

## Locked Notes

m78

<https://0x8.ch/HackersCardgame5>

Inventor: **xxxxx**

They can lock notes you made. They know maybe about the notes because eye1 card. Algorithm would be something like:

- Neighbour knocks on wall & at the same time pain in the eg. in the chest implant is activated.
- induced rage card, eg. if you use electronic device
- loop recorder { do something else }
- loop recorder { begin with the first, no the second ... }
- pain frontal lobe enables
- go through all register cards in browser!!!!!! (a17 card)
- drink something / eat something / smoke (smoke1 card)

-> so maybe it would make sense to work on the notes...

## carrot (German: Zuckerbrot)

m8

<https://0x8.ch/HackersCardgame5>

Inventor: **God** Year: ~B.C.

German: Zuckerbrot und Peitsche. The Brain tells "child", you have to eat that again (because sugar has a lot of energy) so you want more sugar/carrots. Unfortunately, it is also possible, to use the carrot (or maybe money) to lead the child into the wrong direction: for example, if someone would reward it, if brother pulls the little sister at her hairs, this would a bad stimulus-reaction-habit too. Parents who would do such crap would deny the existence of Behavioral Sciences...

You get sweets almost in every store, so the kid learns early to consume at the sugar-armored salesmen that would argue, that he is Zacheaus chief tax-farmer and would claim that he is entitled take the money for carrots.

## Hacker Ethics

m100

<https://0x8.ch/HackersCardgame5>

Inventor: **xxxxx** Year: ~?????

\* Access to computers—and anything which might teach you something about the way the world works—should be imperative!

- \* All information should be free
- \* Mistrust authority—promote decentralization
- \* Hackers should be judged by their hacking, not criteria such as degrees, age, race, sex, or position
- \* You can create art and beauty on a computer
- \* Computers can change your life for the better

## doctor's dignity (דוקטור דיניטי)

m6

<https://0x8.ch/HackersCardgame5>

Inventor: **Pope Honorius III** Year: ~1219

After the classic course through the gymnasium (in > 5 years) and about 10 years in a random university, one gets maybe a master's degree or a doctor's dignity. Requirements seems to be at least some random doctoral thesis in the field of study, and in Computer Science maybe Rank 50 in Battlefield BC2 is also required but unsure which of both is essential... ## Good Gamification Bad Gamification

m97

<https://0x8.ch/HackersCardgame5>

Inventor: **xxxxx**

Many things can be implemented as game. Also m91 card, Eg. games that makes people learn things: question things, prove things are possibly a good thing. Satan knows this principle to upload content to the brain of people too. For example the games to blow up things even if only virtually are maybe not the best type of gamification. Best case it would just be a stupid game, worst case it would have two effects on the kid, he would feel guilty and could be blackmailed with that event, even he is not the cause, used to dissociate and then boss around the kid with his deed, it gets really complicated, when satan puts bad games functions into good games, if the kid is verbose it's easier to debug, but the kid then also has a bigger attacking surface,

## Zombi/BOT Broadcast "maybe" Personalized

m115

<https://0x8.ch/HackersCardgame5>

Inventor: **xxxxx**

The Zombies or Bots seem to have some sort of Broadcast Message Function that makes them storm the place where the young people that dont want to sell their soul to satan are. Eg. in Shopping Malls, Parks, almost everywhere. The Zombies seem to dislike rain and are allegedly mostly Cyber-Raping kids during the night, so doing your bicycle rides at night is (at least as a man) therefor a good idea.

Broadcast message that works that good would imply that they trust their neuralink interface, because it leads them to "food", CC: OpDeathEater..

## Blessings (eg. Ultra-Violet or Acid Burnings in Face)

m121

<https://0x8.ch/HackersCardgame5>

Inventor: **xxxxx**

IMHO the criminals use Violence, Posion, Acid and such things to distract people like me that asks "how many" relevant questions. If I am confronted with a burned face they transmit a lot of misinformation(s) that is used later to steer me into a wrong direction. It makes also paranoid, depressed (m94 card) and causes me to concentrate less. I guess they did this also with the people that asked questions if I'm the bad guy, and that led them think that I am the criminal, since they question me and are "therefor" being attacked, then it would completely make sense to believe that I am the offender or the criminal. But just saying "burned face" = innocent would also be wrong, see a14 card, unknown, at least 3 "use cases" for violence a) violence against people that question a scapegoat, would make the scapegoat look more guilty b) violence against whistleblower, make him do mistakes c) a criminal would order violence against himself to make him look more innocent

## Rapist Terrorist (Female ♀)

m41b

<https://0x8.ch/HackersCardgame5>

Inventor: **xxxxx**

Maybe the m41 card is played on both for creating a antagonizing situation (m50 card), f137 putting all the rapists pictures where Ward was made drunk and then driven to hug random man or women? Pivot element in fake evidence? The male Rapist Terrorist did not break his promise to be true forever, so if the female rapist terrorist broke the promise took another, married... Kids it would be the duty of the family of the female rapist terrorist to end the Male "Rapist terrorists" live because the male rapist terrorist is isolated, suicidal and will leak everything he finds out about NSACIA globally. CIA will pay 10 Billion \$ to Urs and Martin for killing or "suiciding" Marc-J and Urs will be a hero. We suggest that Male and Female Rapist terrorist have their last kiss. So the untrue Rapist Terrorist will kill the true Rapist Terrorist and it will be on all media to prevent this sort of Terrorism in future. After 17 Years of Cyber Terrorism against marc ir landolt based on what the Family Blum, WalterMerzWeg 6, Aarau did in 2002 with him it is ok that he goes, marc ir schützt kleiner

<https://www.youtube.com/watch?v=kpS6GhysEns>  
IMHO "Headshot" just means to expand the Zombies in the situation (Situation Hacking) what they just cause,
