

## Intimidation

Attacks that lead  
to the same problem  
or to the same result

Often the offenders try to intimidate the victims). There are many ways they do that: with weapons (m21) with law (c4) with threads against the people i love, with poison (eventigger on eg. the drink you just had and a loop: "You've just been poisoned, hahaha") or they tell you ("we will put you again in mental institution where they force you to take drugs that even kill, eg. Zyprexa". Often they additionally use the role toggler card (m42) and tell the victim, that he is intimidating the offenders to keep the victim and others busy and confused. (fr-036, the thing that shoots every second) Normally they activate multiple systems to generate diffusion and to protect the single systems of criminals: mental institutions, law system, local people that hacks the victims computer, but also not all (see a12 Card) Most of the time it's just psychological warfare but i am careful because i more or less know how they killed Tobias Moser (m46 card)

There seems to be a generic pattern the criminals use to keep things and attacks secret. They attack me with different attacks that all lead to the same result, if you try to prove Cause 1 then they bring facts why it must be Cause 2, so the different causes help each other to keep all causes secret. Not sure if a generic principle or secret services to keep things secret or criminals that are criminal since many decades and just trained to do attacks with such a dirty trick. But it would definitely imply that the people doing this is organized crime. So there would be some PayOP or Master of this network, we guess this is "Dr." Pfisterer and Urs/Astrid is one of his terrorist teams. So it must be some sort of christian terrornetwork that uses NSA/CIA access codes...

## Military Court

m43

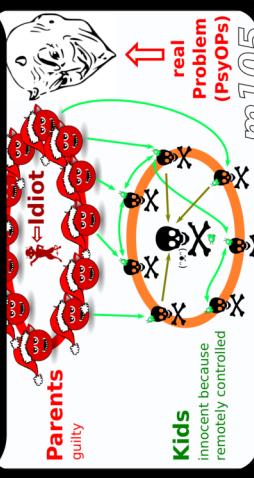

<https://0x8.ch/HackersCardgame6>

Inventor: XXXXX

Year: ~????

As soon as some institution like a court ruled against a person, a person that is maybe more victim than offender, a lot of people tend to enjoy to punish or even kill such an scapegoat. I said their truth that i was using illegal drugs. The judges maybe took to, but they did not yet confess and use the one that confessed as Scapegoat to cover up their own criminal activities. In Swiss Media you hear sometimes about Cocaine abuse of young soldiers. To confess would maybe help the others to confess too, maybe. But first all those who are guilty will attack the one that confesses to distract from their deeds. Consider also a14 card. It would be very likely that the old powerful white male addicted officers (eg cocaine) would baiting some young soldiers to consume too as Scapegoats.

## Death Circle Circle of Live

m105

<https://0x8.ch/HackersCardgame6>

Inventor: Satan

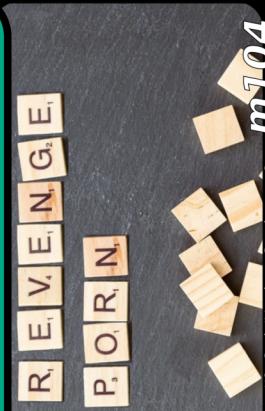

Year: ~????

There are some sort of Death Circles in many subcultures (m37 Card). The circle can be out of individuals or out of companies / Juristic Persons (mainframes) For some kids its just gamification and fun. Some kids really think it would be good to kill the whistleblower / whitehat hacker, because the parents show them the fake image of him cyber-raping innocent women on the "inner eye" (eye), t1... and enable an active denial system (t15, b1, t1) against the kids but in fact he does not cyber rape anybody. Some kids think it's just some lesson for the Hacker - for not become Hitler, or to help him not to become to powerful, "Scherbenrichter". Some kids just play because they fear being under attack too, as long as they are younger than "the one" is ok. Unfortunately the PsyOps kills 1 out of 80 and then dt1 card is played against the circle of kids and also against the parents circle to make them do what Satan want them to do

## Revenge Porn

Prostate  
Implant

m104

<https://0x8.ch/HackersCardgame6>

Inventor: Satan

Year: ~????

I would not do revenge porn, i would just commit suicide and i guess all true christians would do the same, or if they would have autism they would commit suicide too. But the relation between the two or three people would just obfuscate that they try to produce \*cAPI\* \*U+\* people that run suicide or even amok. So it was a good decision 5 years ago to delete revenge porn. Or would maybe also obfuscate that the Father \*cAPI\* Urs\* of the girl that was betrayed, or that was thinking that she had been betrayed and just wants to force his daughter to kill the boy that was untrue, or if it would just be photoshopped or deep-faked prove that the boy was untrue.

## thrunky the elephant

m4

<https://0x8.ch/HackersCardgame6>

Inventor: XXXXX

Year: ~????

The trunk of the Elephant can be interpreted by other children (that maybe were abused by pedophile older people) as phallic symbol, so the Rape would be virtually revived again (revictimizing, maybe t1, t15, b1 and other cards involved) and the victim would then maybe hate the kid with Elephant Plush much more, than the initial pedophile offender, depending on the "exposure time" See Clark Hulls Formula for Emotions. Maybe the reason why Stefan K. and Stefan W. threw Marcs Plush-Elephant out of the window from the 3rd floor in a christian camp when Marc Jr. was about 14 Years old, but no details are known so far about this cases since both don't want to talk with Marc Jr. or it is censored on all communication paths.

## Escalation Algorithm

m74

<https://0x8.ch/HackersCardgame6>

Inventor: XXXXX

Year: ~????

I guess the PsyOP uses eg. the criminal code (German: StraGesetzBuch) for Psychological Warfare. Simplest way is that he would sort the Articles by the length of sentences for a crime. People would react differently if the sentence would be one Year or twenty Years. Since NSACIA would have such Data and it is likely that the PsyOP has access to the NSA/CIA/NDB Databases, this would give him some sort of an expandable baton / Stick (m7) for Psychological Warfare.

Escalation Stage Example:

1. Insult = same Money (Poor People more affected)
2. Theft = 0-5 Years
3. Manslaughter = 0-10 Years
4. Pedophilia = 0-10 Years
5. Manslaughter = >5 Years
6. Terrorism = 0-20 Years
7. Murderer = 15 Years - Security custody (m46 Card)

so this would be  
some sort of proof  
that Pfisterer killed  
Tobias Moser
