Islamophobe "Christianist" Terrorist. Run amok against 77 innocent young victims. As far as i could find out he was some sort of "home child" "Street child" where one can only speculate that he was former to an assassin with eg. Technology Cards t*. His manifesto was "symbol minded", so i guess that it was some sort of symbol language they used. Maybe combined with legal or illegal drugs, maybe only in the beginning to set the base stimulus-response-habits. If this hypothesis is true, then the people that planned to kill the 77 victims is still free and plans maybe the next assassination. And the chances to find evidence on his devices or the devices of his neighbours is quite small because those people would assassinate innocent people as a profession. Maybe Epstein "customers" can be activated as Terrorists or more likely that they would use younger people to do such things, eg the equalaged partner of their victim(s) m38 > c06 > m34 or at1

But in fact often the oldest children suffer the most pain, but a14 card maybe applies too [L] [L] Was die Anis... der CIA können, können wir schon lange! Gifted, held in prison to make him and the others fear. In this case, Collin James Farrell, who presumably was identified in psychology tests as a man "who will once make trouble". For example in a test like mmp12 the parameter "feels responsible to leak the truth to the society" would stand out. For the Mates it is Psychological even more worse to see how he is tortured. Beeing the one that is beeing tortured becomes normal after a while. But the mates should stand up and say "stop that torture", but those who would stand up would possibly be upgraded to a captive too...

Young people play games for fun, for having a meeting with friends over Teamspeak/Mumble (maybe mainly to discuss about Computer Science Stuff).

But there are also situations where the game or additional software tells them that if they win the game they would win things like women, money, degree... this wishes then maybe never become true

Later the people who added these features would tell that because of this headshot or nemesis pin with knife a real person died (dt1 card) so better focus on the Computer Science stuff.

Guybrush Threepwood had the role of the hero In the Lucas Arts game Monkey Island™ In classic tarot he would be "The Fool"-Card, actually too stupid to save the world, but has non-normal distributed luck and his childish behavior gives him high values in the mayer-briggs dimension "agreeableness" which would be perfect as a chessfigure would of satan, admiring Guybrush is stupid not telling that he can use him.

But ignore him, focus on the technology cards that produces real three-headed-terrorist-monkey!
