If a NSA/CIA would have access to all peoples data, even the private diaries they would maybe install some AI that analyzes what the whitehat hacker just says, writes or thinks.

Then they would try to match that on persons in his/her network that would get a cognitive dissonance because of that sentence or concept knowledge even when i dont write names in my diary.

CIA would possibly know what person or eg. Meyer-Briggs archetypes would rage because of what i just written into my privat diary. So it would be possible that the CIA/NSA would intentionally send this private diary entries to people to "motivate" them to attack me.

# SYSTEM-THEORIE

A **System** is made out of **Elements** [E] or several Subsystems (= abstracted an Element too). The Elements have relations (**Relations** [R]) and the relations have (German: **Conditionierende** [**Kj**]) that describes how the Relations have to be. The Law or the Bible or the Koran(?) or Karl Marx "Das Kapital" could be such a "Conditionierende". This helps to understand the big picture. Social, Mechanical-, Biological-, Computer-Systems or Software.

For example if you have Quantuminserts, Tarmoil Turbine you could also filter or inject words that would make the victim look or drive insane.

**Year:** ~1960

**Artificial Intelligence**, but also **Propositional calculus** or **Prädikatenlogik** (= eq. PROLOG) or learning algorithms, the so called singularity is maybe already here, which would explain why I wept when in the end of the Movie "Artificial Intelligence" finally sees his "Mother" again. But this should not be his mother, but his equal aged mental mother that showed him the women side of the world so many years ago. Companies are Artificial Intelligences too, but mostly from the dark side of the force. If you want to learn it maybe begin with **mini-max-algorithm** and **Tic-Tac-Toe**

Control your **touring complete** Avatar and say something if he/she suggests wrong things like violence, murderer, amok...

If something like **Medulla** **Oblongata** or **Medulla Spinalis** implant (Spinal Cord implant) would exist, they would need some sort of Matrice Operations (Jacobi Matrices?) to calculate the Body Movement. In my particular case i guess there is a **malware**, that is activated when they use m99 to target me. They seem to change the sign of one axis or making me steering me into singularities after about 15 minutes after i started to do body care to make me hurt "myself". So maybe it's just one of those additional Networks that is 99.9% of the time silent, that overpowers the signal i should receive with a value that has an additional minus sign for that specific axis. But not yet sure about that.

**Access Based Enumeration**

Customize

Access-based Enumeration

Access-based Enumeration makes visible only those files or folders that the user has the rights to access. When Access-based Enumeration is enabled, Windows will not display files or folders that the user does not have rights to access.

Enable access-based enumeration on this shared folder

Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. The same principle maybe applies to websites, youtube, maybe even grub... If you look at the m50 card the same system "could" be used to split society into two+ separate groups, and there would be even some triggers known to some of the older groups to start a civil war between this two groups. Maybe to explain **Access Based Enumeration++** to the society would deescalate this problem a bit. So update your people with this knowledge. I learned about Access Based Enumeration at ABB Technikerschule Baden, hopefully the teach this function not for the dark-side... if done in the graphics card or graphics driver one could manipulate things even if he checked if the file was transmitted correctly, so one need to print all evidence.

**Suicide Death BOT**

If a person was controlled or at least influenced by some technology cards & evil people unfortunately could create some sort of a suicide death bot, using things like m38 card for priming to make innocent people to commit suicide (attempts). We think that this is the major way eg. CIA kills people that know to much and the reason news are normally not telling the story from people that committed suicide (maybe they killed Ian Murdock with a suicide death bot). People with lower rank would be told that it's just training or BDSM. But in fact if the Whistleblower would die the whole group would be lost too and so controllable by eg. the CIA, wrist case m37 & dt1 card. Those groups that already have "trained" a kid to death would never confess. Forced to keep silent. Possibly the code of such suicide death bots would be packed into proprietary non-deterministic crypto both personalized or generic, eg. m38 would be generic. Was Jan Murdoch@Debian also a victim?
