

Submissive Pet

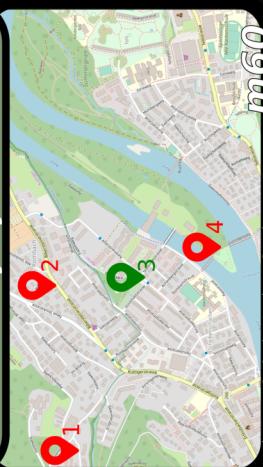

m29

Inventor: xxxxx

Like a plush: to hug, pet and care for but more interactive.
Clinical use: as a coping strategy, e.g. you can buy a shy cat for a scared child, which then helps the child to analyze his fears without focussing directly on his own fears, that then might would lead to a cognitive dissonance & avoidance behavior instead of analyzing the things that caused the fear (Anonymous ↳ Case Dusty: where I would expected, that Kenny "learned" violence e.g. from his father, so in worst case Kenny is a victim too, and if Anonymous would have beaten the shit out of him then someone maybe wants to play a dt1 card to the whole anonymous crew, unsure so far)

Location Based Psycho Terror / Psy-CyberWar

https://0x8.ch/HackersCardgame5

Year: ~easter egg"

One can program events based on the coordinates of the victims. For example if i would be near **1** the annoying janitor would be activated (t* cards) and even attack me. Or if i would be near **2** lot of cars pass by, **lot of stupid males that let the engines howl** would "coincidentally" appear. For this algorithm they must know your **normal route** and the average speed you have with your bicycle. It could also be used for good things, for example at **3** there would always be a lot of 20 years old that smile friendly at you. Anybody added me just the red scenes. It is also dynamic, so the "design pattern" eg. number 1 for example could even follow me, making me paranoid. So it's more of a evil design pattern that nunts me and after a while one gets completely nuts.

Optically discredit people

m92

Inventor: xxxxx

2009. Full of hope "to change the civilisation into a better state"

2019: Shown as criminal or Rapist, signs of psychological Warfare
In my case they also did such things, for example the "anti psychots" also made me look ugly and made me behave strange, so that the people stopped or even feared to talk with me (m41) and they also told my friends that i would have raped a girl, killed another friend, so they definitely tried to kick me out of the group of my equal aged friends that weakened me. But to be separated also helped me to stop drinking alcohol. I was drinking alcohol with friends but never alone. "Maybe" a bug in their plan. Being alone helped me to reflect about me, my past, the scenes that lead to the isolation, this cardgame helps to explain such situations.

Conspiracy Theory

m27

Inventor: xxxxx

One of many conspiracy theories like "Chemtrails" conspiracy, is "offered" by Google, as soon as one falls out of the standard consumer behavior. In fact the photo shows only a balancing test of a Boeing plane. In order to be able to shift the weight of the aeroplane, it has pumps and water tanks. "Switching on the toxic sprays" is simply when the plane enters an air layer with more humidity.
Some sort of **reverse-exploit** to such google queries one could use his native language and redefine the word what "**Clel Vote**". What then would mean that it is a parable explaining, that the upper ranks in the mainframe are trying to make the lower ranks having no plain sight in the mainframe.

One could create a touring complete avatar of the victim or the scapegoat and every time when the jury or his social system would of equal aged would listen to him and begin to believe that he is just the scapegoat, the victims / scapegoats touring complete **avatar** would **start to insult, intimidate the jury or social group**, so the group of equal aged would stop listen to him or **even begin to attack him**. This card seems to extends the m37 card -> dt1 card.

Technically it would be samples of earlier scenes when the victim or scapegoat was tortured and he said things he maybe just repeated **"blackmail and dissociate the left over 79 that themselves said Yes to kill the rapist terrorist"**, but in fact the Neuralink just transmitted this approval and stored the scene in NSACIA Data Retention. **So we question the honesty of the universities where Jake learned and teached.**

Its all the fault of the **mothers fault** <<< or the fault of the kid, >> but **definity the mothers fault** << There are [Mothers/Vathers] that force their [daughters/sons] to eat from the forbidden tree. There are also [Parents that don't feel guilty, so they would not have a reason to force their kids to eat from the forbidden tree. IMHO the NSA/CIA tried to use Jacob Applebaum as **jesus scapegoat**. The Applebaum would be a symbol for all those people and sinners that killed an innocent equal aged friend (one out of 80). So the CIA has a reason to kill will ask lots of relevant questions that will maybe prove the innocence of the group of equal aged "judges". **"They're the same as Mum, Cimo, Scramce, Kitten BY parent generation, teenagers are the next step"**. People like the m37 card until dt1 was played. They like because they are once not the person being sued but the "cool" judge that is morally better. Origins of this behavior maybe comes from the childhood and beeing part of a Group

The TV-Series "Bull" just obfuscates this. Mirror jury (represented by a mirror ball) would mean to **motivate young people to judge an equal aged kid**. Worst thing that could happen is that this equal aged kid runs away with last money, and then they activate a old ugly Bot (m48 Card) that eg. touches food, on t1... they say that a suicide death bot was transfert to your last food. The bad thing is, if you then would eat this food this m44 would be activated. The only **workaround** i found was to **throw this food away**. I guess this is how they trigger poor people or homeless people. The victim of this cyber-attack would then maybe attack the person that transferred that malware (m5 Card). Often this sort of Malware spreads to your whole existence and use same sort of malware eg. on **womans underpants**. We should transfer the malware back to the person who transferred it, but uneducated person would run amok.

They seem to play this card only if one have hardly no money or spent last money to red cross for water in syria. One buys food with last money, and then they activate a old ugly Bot (m48 Card) that eg. touches food, on t1... they say that a suicide death bot was transfert to your last food. The bad thing is, if you then would eat this food this m44 would be activated. The only **workaround** i found was to **throw this food away**. I guess this is how they trigger poor people or homeless people. The victim of this cyber-attack would then maybe attack the person that transferred that malware (m5 Card). Often this sort of Malware spreads to your whole existence and use same sort of malware eg. on **womans underpants**. We should transfer the malware back to the person who transferred it, but uneducated person would run amok.
