Old pedo Parents "need to control" what daughters write in their diaries, letters, and of course "they need to control" the daughters sex toys - just in the daughters interest, that's what they claim but in fact that sort of parents are peoplephile, I'm at least 51% male but have similar issues, they render samples on objects in my apartment. They add Eventriggers like: "The open bottle on your dining table was poisoned while you were away", they even render things on things in my bedroom. A workaround I found is **sealing wax** if you **seal** your **apartment**, bedroom, servercase... before you leave, they still render such things on your goods, but if the seal isn't broken you know, they cheat and just render it on your goods (**Psychological Warfare**) The Loop "Neighbour Smith or Brother Dominic" was it? would intentionally start a local conflict with a scapegoat that would distract from the real criminals: <https://www.youtube.com/watch?v=y0yApkDxm>

UPDATE: one day after I released this card they added an event trigger on my door that distracts me to break the seal on the elevator. (PsyWAR). This would some sealing wax into the elevator. (PsyWAR). This would be another hint that the criminals are old people with a lot of time.

After a traumatic event like death of someone in family or after a rape (or just m38 card) people often show the behavior of "self injury". And if someone does self injury they can put him into a mental institution. In the mental institution he or she gets tons of "antipsychotics" that make stupid, lazy. If the victim is whistleblower or **whitehat hacker** that tries to show the public things that go wrong to fix those things putting the whistleblower in a mental institution would be **great** for the **offender**. Maybe they tell even play m41 card to make the group think the self injury is because of them, finally playing the d1 to blackmail and silence the whole group. Workaround: just have plastic knives in your household. **There are victims that suffer much more (below my image) than i, if you know her, have a good heart and are medically gifted AND about the same age please help her.**

 If they want to make you believe in a lie they sent you eg. by Mail, Twitter or Facebook... there is some sort of pattern matching algorithm that then starts distributed over several channels Twitter, Google, Facebook, Mail...) making you believe in that lie. Since if your brain gets the same stimulus like the lie you initially got, it begins to feel comfortable with that lie and the possibility that i believe it is bigger.

Here you see an example of an implementation with Jaro-Winkler algorithm, the same possibly works also with images, speech and videos. Such an algorithm would definitely imply a big player like CIA/NSA.

btw: Great visual representation of Jaro Winkler by the way!
