To record and play sounds digitally. (cards: c02, t10, t12) You can change pitch, bass, trebles, snip single words and glue them together like you want. It is also possible to use other mathematical models, e.g. Fourier analysis/transform to analyse the samples or to modify them. Simplest variant, if you play twice the same with delay of 0.2 seconds to achieve an echo effect. If you create a physical models of human voice you could even fade between 2 different voices (see t21 card). To make music, manipulate voice recordings prior to negotiation, behavioral sciences, e.g. The "Pavlovian Dog" experiment... but also a very cool kids toy.

## Classical conditioning

Inventor: Ivan Petrovitch Pavlov ~1905

Step 1: Conditioning eg. 1000 repetitions  
  $\Rightarrow$    $\Rightarrow$  Mathematical NOT  
  $\Rightarrow$  

acoustic, visual, lights, colors, emf, t1 card...  
People and Animals, to help and protect but unfortunately also for things like at1 card  
Computers can be used for that

With a golden wire / metallic substance that was injected into my throat they contract my muscles (possibly radio waves) that makes me paranoid. At the same time they loop the sentences "You have Cancer", "It's because you smoke", "It's just a game". That confuses / depresses me. BDSM toy materializes later, possibly shields the radio waves or revictimize me, or some sort of hint in case i would die. Curing Strategy would be, if you think that it is just some sexual game, but in fact it is illegal torture to silence whistleblowers / Whinehat Hackers. Since I'm interested in the truth, I am maybe on the right way to find those old people that destroyed so many lives. Unsure if this could be induced also by something like t1 or t6 card. I guess, they use EEG (eg t1 Card) return channel to find out, if it succeeds destabilizing my psyche. They don't peeks or spikes, otherwise it would be clear that it is electronically induced, if they do a crescendo over several hours it really sucks. Additional there is a bloodoo saliva mind, if you have permanently blood in you saliva visit a doctor!

The newest versions Neuralink/Elon Musk, maybe HoneyPot The newest versions Neuralink/Elon Musk, maybe HoneyPot read EEG data transmits signals to brain. Can activate certain aggressions in brain, wires in the Amygdala would probably cause aggressions (t11 card). Active community (read only, and non-invasive) on Twitter: @OpenBCI. Even things like directly "built-in" Augmented Reality (like PokemonGO) could be achieved with such technologies. There are maybe other ways like detector (c02,m57,m7,m12,m13,m60...) (HoneyPot). Maybe sold as influences emotions, automate/abuse victims, CryEngine / Unity (m98,m99,m32,m60...) Warning, it seems that if you find sources about this sort of things they upload Porn or even Pedophilia Content to your computer and activate the judges or m37 card... Additional Biassass Protection for the group m46 first as shown as m41 over t1 then m37 -> d1 so people can not integrate the existence of things like Stimocceiver in their world view, Mathaeus:7:1 video not mentioning implants, i question that, YouTube: Ch Honeypot

## Loop Recorder "Dormiphone"

Inventor: Petroni Corporation (1933) ~1952

An analogue continuous tape, where one can record suggestions such as e.g. 2 + 2 = 5, which is automatically activated at certain times. The tape will automatically turn off after 5 minutes. With digital Equipment (computer / mobile phone / IoT) one can realize more complex systems. And there are possibly also several different channels. (see cards t1,t7, t3, t12)  
During the night, overwrite things (c05 card) or learning things while sleeping, eg. foreign languages, unfortunately you can also upload a complete (wrong) world view to the brain, or tellers, occultists, esoterics, fairies, trolls, non-medical practitioners, Satanists? ... So bricking all the spears would maybe cause more problems than it would fix.  
But giving the good ones, that are not older than 1978 some cards could maybe help to find out if he / she / it joined the dark side or not.

## EEG / OPENBCI Electroencephalography

Inventor: Hans Berger Year: ~1929

EEG was originally developed by neurologist Hans Berger. The Brain Computer Interface is an EEG that recognizes patterns of brain currents with software (pattern recognition, AI, Deep Learning) and can activate events e.g. to start the IoT-Roaster or more worse things like flushing your brain or starting a SuicideDeathbot (card b4, a16). Today with more computing power, there are much more possibilities than in 1929.  
If the interface is bidirectional things could become a Self-fulfilling prophecy, (see card c02)  
Can be used as lie detector or to control computer games, read thoughts memory and read moods (stress / relaxation, eg. NeuroSky MindWave Software)

Thanks to the guy who has drawn this, i really like that image. Look at the a14 card. I don't think that all witches are black, there are maybe also Fortune tellers, occultists, esoterics, fairies, trolls, non-medical practitioners, Satanists? ... So bricking all the spears would maybe cause more problems than it would fix.
