

Needle Array

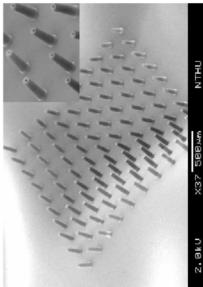

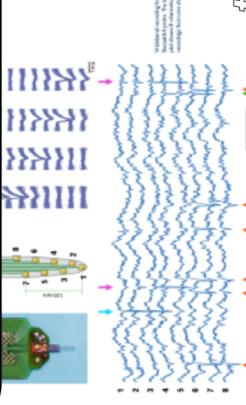

Figure 3: SEM of hollow micro-needles fabricated on a flexible [t28]

Inventor: XXXXX Year: ~????

Elon Musk says "we don't have enough bandwidth to the brain" but if you look at research like "micro needle array" then you would see, that one could create massive parallel interface to the brain. We guess the design of Elon Musk's interface is completely bad and that he even knows that. What Elon Musk shows in his shows about the Neuralink would just be some sort of Neuronexus Product that he possibly did not even develop himself. It would be very likely that Elon has already such an implant and is now producing a low-tec interface that would act as honey pot. We will send this card to elon with the hashtag #Neuralkink but we don't think that he will answer, maybe even filtered or he is being blacknailed by eg. the CIA....

NeuroNexus Implants

[t29] https://0x8.ch/HackersCardgame5

Inventor: José Manuel Rodriguez Delgado - 1950

Originally developed by Delgado, possibly been enhanced "in secrecy" since 70 Years, placed directly in the brain, and with software like OpenBCI and maybe Deep Learning algorithms possibly recognizes even detaild thoughts. (see [Neuralink](#), [Elon Musk](#), [HoneyPot](#)) No matter how good the encryption would be, if wires are made out of metallic wires all such devices would be vulnerable to side-channel attacks ($f_c = \lambda / n$) if geometry if the wires are know and there nearby (unsure if t25 or t26 or both cards) I tweeted to Elon Musk asking what he is going to do about this vulnerability, but he did not answer so far. Maybe just HoneyPot for older technologies, and maybe Hashtags are filtered.

Fill-Gun

[t27] https://0x8.ch/HackersCardgame5

Inventor: XXXXX Year: ~????

Fill-guns are sold as a Ring on a chain, for example in Tolkien's "Lord of the Rings". In fact would be black box with socket and reset button to delete the keys on fill gun. (Hopefully one has implemented an enhanced delete function) If you put fillgun into a Military-Radio (SF235, or t25 / t26) with frequency hopping the Cryptological Keys are loaded and radio would join to Military Network. Frequency hopping would allow to transmit to golden wires (e4) in the body. Main question would be, if the fill-gun loads a radio, where are the fill-gun loaded. Afair Urs B. told me once that the Zurich Insurance has two specially secured terminals. Male Lobsters (biol) tend to show off with objects of power to compensate their low self-esteem, in Bière an officer also showed off his Fill-Gun proud. I / We guess that the Fill-Guns gives the owner access to all owned soldiers.

Infrared Ray Weapons maybe in every Display

[t38] https://0x8.ch/HackersCardgame5

Inventor: XXXXX Year: ~????

It seems that the NSA/CIA Terrorists Urs Blum, Astrid Blum and Hansrainer Fissterer Aarau have Activated some sort of infrared weapon on my display, that causes pain in the eyes and makes my skin red. After I found out the evidence and makes my face red. After I found out the Body lotion [Kantenschwamm](#) helped me. Before that did not cause this blushing. This is because you eat this and that [Kantenschwamm](#) contains a lot of acid. The face that was [Kantenschwamm](#) was [Sonne](#) never the face that was [Kantenschwamm](#) was [Sonne](#) never. The swiss [Brennende](#) acid in my body lotion (???) 3. Claudine B. built an infrared laser (closed roller blinds, and closed curtains) they added multiple [Kantenschwamm](#) to make me believe that, maybe paid by acer to obfuscate the infrared Ray weapon they put in kids toys. My death in the garden of those who did this to me would be an acceptable price to prevent people from putting (cyber-)weapons into kids toys. Point 3 im not 100% with c02 & t33 would be possible i guess, since i seal my apartment, even when i'm in my apartment.

ICD10 - F44.X Chess Clock

[t37]

https://0x8.ch/HackersCardgame5

Inventor: XXXXX Year: ~????

IMHO there's sort of Cyber Mainframe Chess Clock that puts people into dissociation state, makes them blind for certain things or people, even if would live in same appartment. Technically one could implement that with "Behavioral Sciences" also known as Torture. If you cause strong PAIN (see microdot below image) as soon as the one you love is in sight (eye1 card), maybe linked to an additional Stimulus (acoustic, visual, implants...) things or people might be invisible <insert>for the person that should not have read the PAIN diskmag</insert>. Worst case: helps to GUARD the world, young boys & girls, best case: "used" to rape mental institution, where she stood in front of me and i was on my knee having "some" pain, as soon as i have prove or hacked it with the microdot i will maybe create a card in hackers card game, unsure if hack would be blue or red team

Chemi trode

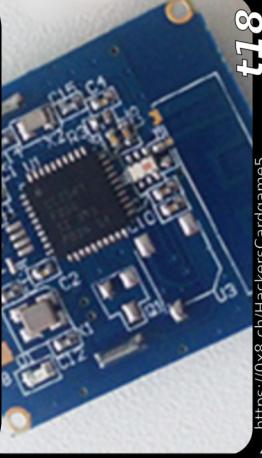

[t35]

https://0x8.ch/HackersCardgame5

Inventor: José Manuel Rodriguez Delgado

Implants which release chemical substances / drugs that can be triggered via remote control. e.g. Adrenaline metabolism-promoting substances aggression, in the case of melatonin metabolism sleepiness. Influences victim's attention, but can also trigger the victim a suicide or to run amok. Medication but unfortunately with Toxic substances. Today there maybe exists chemitrodes on molecular size. WARNING: It is very likely to loose codes of chemitrodes, and then the person that injected the chemitrode would be responsible for the death of the victim that died just because of a SIGINT security problem

WIFI / Bluetooth or other beacon

[t18]

https://0x8.ch/HackersCardgame5

Inventor: Heinrich Hertz

Year: ~1930 (E.g. The Apple iBeacon is a radio bank or a radio body with memory and a small processor, Can be used to place virtual GeoCaches, but unfortunately could also to transmit a Suicided Death Bot (a16) to a Cell Phone, Computer, Computer, WO200505579 to activate the victim to a suicide or amok run, worst case "Nuke function" like in Lemmings™ in 1990s.

- * children's toys, GeoCaching (=Sports)
- * air traffic control (ADS-B)
- * unfortunately also electronic / psychological Warfare

hiding data and evidence

[t34]

https://0x8.ch/HackersCardgame5

Inventor: XXXXX Year: ~????

As a younger person one has almost no possibility to store evidence in a way the older criminals can not find or delete. Especially if you would have an eye1 card they would know where you hide things. You have for example a big library you could take an SD-Card (i dont trust SD-Cards) or an USB Stick and take of the housing, then you can put that in a book from a library. If you close your eyes and select a random book you dont even know by your own then it is stored and even know by your own then it until you have the stick back, but the older criminals would have to search too. If they know about that, they maybe start to search too, but then you can prove that they are actively searching for evidence, so you can call the police and make your case.
