If you know Star Trek then you know what this archetype thinks like. Focussing only on profit, ignoring the pain of the people they take the money from. Even risking lives for profit.

As a Christian and psychology student, she saw that the Nazis are killing Jews, patients in mental institutions, innocents. She began to print flyers with her brother, distributed them at her university to stop Hitler. Unfortunately she and her brother was sentenced to death by a Nazi judge and murdered by the Nazis

May white roses materialize on her tomb

Opinion: Germany be proud on people like Sophie Scholl who had that much courage to give up

TIT supportor Scapegoat archetype

Computers are highly complex, nobody understands really what a CPU does in detail. Also Operating Systems are complex, if you would take an average Operating System you would have at least 5GB 1GB RAM and 500'000 A4 Pages that would weigh 2500kg, so if you would multiply that with 5 one would easily find out that nobody could handle that. Therefore the companies invented "The IT Supporter". In the early days they got a lot of money, today not anymore. So if something goes wrong or even someone dies because of the role of the IT-Guy, the companies will be blamed. If you add the complete content that is handled with a computer it are more Exabytes than Gigabytes. So definitely nobody can handle that. But of course the 20 Years old IT-Guy will be held responsible, even if he is the one with the smallest salary like I had in 1999 at ABB Flexible Automation, ZH Altstetten. And if you would tell what happens at such soft of companies they maybe even kill me. CIA/NSA would disable malware if the support analyzes the problem to interact with sexual integrity of equal aged women since CIA would "not" attack women.

Since the Roswell-incident, the CIA possibly tried to keep illegal Human Experiments secret and told the people and victims that such incidents were Aliens "attacks". Those who found out tried to find a way to protect themselves are thrown out of the society. Because tin foil would possibly block things like the Stimoceiver Implants, they started to discredit this archetype in Media as a Crazy Person. Not sure if tin foil helped at all, possibly depends on frequencies and transmitting power. We should pay some tensor-magicians or better enslave them to calculate this for us for free.
