

eStim **CO08**

Inventor: **xxxxx** **Year:** ~????

When i was an about 10 year old boy "my voices" (tl. t10, t12...) Card told me to put wires to my genitals. In 2010 this programmed stimulus was often used by people at ABB Flexiblen Automation AG to dissociate me and to make me work faster and to make me look guilty. I dont know if these people knew that this specific stimulus was used if their stimmociver showed something else like "Marc had associates because he raped a girl" even when i never had sex until then in 2010 (I was forced to tell my shrink (Hr. Dr. Hansjörg P.) what i"ll have done. He seemed to ignore that completely, did he knew about that? Then i was accused to be a terrorist and again in the Mental institution Königseleiden. Was that the reason why they played the (n41 Card with Sahra?) I also question the circumstance that in german it is called "Bananen-Siecker". Obscures technology Cards. This happened after i got my first computer (c64) in the age of 6 years, so maybe this is a psychological backdoor, maybe.

social network-graphs **CO07**

Inventor: **xxxxx** **Year:** ~????

With Vectors and Matrices you can calculate Networks. For example this image is from an app that is not allowed anymore on facebook. It could extrapolate all my groups in Aarau i was part of Primary School Küttingen (color 1). Boy&Girl Scouts Arau (color 2), University of Applied Sciences (FHA) where i studied first (color 4). And this information was generated only from the interconnections between the elements (see a12 card) not even from the things people posted. If you would add Natural Language Processing and eg. some sort of MayerBriggs or Big5 Psychology test you could generate quite good personalized Suicide Death Bots (see card a16), counter measure, warn the people that some criminal people did and do such things to me and are maybe doing such things also to other people

induced rage **CO06**

Inventor: **xxxxx** **Year:** ~????

With stimulus-reaction-habits, for example if you get always a reward (m8, see also card b2, b3, t1...) instead of after 1000 repetitions you will get punishment instead of a reward (m7) things like like here would happen. Or if a person invests a lot of time in one game and then would be banned forever from the Game, even worse if it was an unfair decision. The problem is if one has something like a spinal cord implant, then the whole reward / punishment thing becomes obsolete. So in both cases Computers can produce people that run amok. But with spinal-cord remote controlled he would not be the real murderer, and you can not blame only him, because the person that remote controlled him would just kill with the next "BOT". Try to find both, the BOT and the person that tries to make the "BOT" run amok. https://marcandolt.ch_ml_buzzernet/2016/04/25/vorstufe-zu-brevik/

Piracy & Relicensing **CO04**

Inventor: **xxxxx** **Year:** ~????

As a kid i pirated lots of Software / Music / Movies. So they blackmailed me with that until i relicensed everything. As far as i know i relicensed "Monkey Island 1" and/or Doom! about three times. After they could not blackmail me anymore with piracy they began to blackmail me with things that go against my sexual integrity of they used scenes like "you've just been raped" or "you've just been raped under hypnosis" after all, they should not have relicensed all, because you maybe feel bad about things you "stole" or copied, but the other things drove me into hundreds of suicide attempts. Additionally if you have prove for real crime or even murderer and the accused would use this NSACIA dataset to blackmail you, as long as you dissociate because of your piracy-sins he will dissociate you but not you, unfortunately i relicensed almost everything, but one good thing in relicensing things you pirated eg with 6 Years is, that the records maybe help to remember childhood scenes.

behavioral Science stealth mode CAM **CO11**

Inventor: **xxxxx** **Year:** ~????

If you would add a device to a webcam that can cause lot of PAIN, for example with sound above 120dB or with an implant or an Active Denial System that causes all nociceptors to fire at the same time? Maybe one would not see the cam after a while. This would be some sort of Skinner Box or classical conditioning (t2, t11) and maybe cards t10, t14, t15, t32, t33, m26, endol-, e1, e2, e3, e4, involved. The cam would become invisible for the poor mouse. Even specific images shown on computer. So this would maybe the real reason why Pinky & Brain never wins. If you feel PAIN since 17 years one could begin to ignore that there are invisible things. But in my case (i guess i'm a bit Autistic) this would be an invitation to hack this of technology. And since i would be the mouse it would be a self-experiment and therefore to try to hack that would be a legitime move. Not proven YET.

PreRendered Destruction **CO10**

Inventor: **xxxxx** **Year:** ~????

They seem to know every cable in my local Network, and they put some sort of traps (Eventringer) on my equipment to destroy as much of my equipment. Eg, making me pull the wrong plug, making me stand on equipment. For example here the power cable that i can pull straight, but in fact it was the HDMI cable that was upside down in my screen and broke the cable and even broke the HDMI Port on my monitor. The "be lazy stimulus" would prevent me from checking that, so the next time when i would be in a hurry would waste my time. It is very likely that they simply could switch of devices by remote, but if they would do one would contact producer. So playing it that way would have another "advantage" for the offender, he then would loop "you destroyed it" by yourself and play the "induced rage" card...

brain implants info deffence Statemachine **CO11**

Inventor: **xxxxx** **Year:** ~????

for all people that are not sinners there is some sort of statemachine that tries to obfuscate the people that were tortured 17 years with this technology: "they" is parametric, local social network graph ->military INSERT: tweet to swissarmy, would activate ->insert MINESWEEPER -<- falsch spur, eventriger, schutzbefehlung?

1. they ranted verdingkids (mitgefühl) wenn selber onfer)
2. they implanted me a booby trap into the body (angst)
3. CAP n! (INSERT: lüge) -> Bibelverse als falsche spur
4. suicide death bot
5. medula spinalis implant or drone you, death (für just psychological warfare)
6. reconnect to the girl you love
