

3D GAME-ENGINE (eg. CryEngine)

Inventor: Dr. E.F. Skinner
SkinnerBOX v15.3

t17

Year: ~1981
Inventor: Silas Warner

Castle Wolfenstein (Muse Software) was maybe not the first 3D Engine, but maybe it was the first enduser 3D Engine. Like a SkinnerBox (t2 Card) but "innocently" wrapped as children's toy that uses invasive (eg t1 card) or non-invasive (eg t12, t8... Cards) technologies. Such games can be unidirectional or bidirectional (eg. p4 card). Similar to a network monitoring system possibly by the user, or as a separate addon that just evaluates symbols in the game (eye1 card) or bigger things like Quantum Inserts, Turbine, Tarnroll, Game, fun, therapy or "therapy", game could also generate profiles like Bigs, Mayer-Briggs or even MMP2. For example i bought a game, joined the server, saw the first enemy that had his back to me but i could not shoot him as a vegetarian.

PoliceCar (Stimulus-Reaction-Habit)

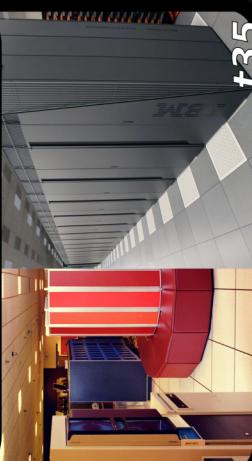

Inventor: Romatis

t16

Year: ~500

Etymologically, the term police is derived from the Greek τόλος, polis -"city". It referred to the entire public administration (today as "construction police" and "fire police") outside of Greece as the fashion word of the Romans. Maybe abused as Chessman of the authorities, and in many countries the police are the group of people who commit the most murders. See also Americans 58 Times More Likely to Be Killed by Cops Than by Terrorists. Violence, riots, sometimes conflict rather escalating, often intimidating, biased often preserving only the power of the upper class, we should teach all cops Inductive reasoning. (can you find the intentionally placed bug in m55 card?)

CIA MAINFRAME

Inventor: ??????

t35

Year: ??????

... it installs all the nasty cards to the people in Switzerland "Central" "Intelligence" Agency. First it would not be central but distributed, second it would maybe not be that intelligent. It seems that CIA begins to blow up his PsyOps after one found that PsyOp creates multiple Death Circles (see most cards) It would likely, that the PsyOps have contacts to the CIA network. *CYBER Blitzkrieg* (we translate what the CIA would like to say, it are the >>Nazis<< um the Germans and no the cia does not actively obscures qfire, quantum inserts, TURBINE and TARMOL) But we guess that there are some sort of batch jobs that owns systems globally, not only computers or mainframes, but also routers, handies or the Swiss INTAF... Who writes the interfaces? Kemberos? We need to find out what devices can access Stimociever, Neuralink... Wrist case most ender devices have some sort of SDR devices that can access t* cards. In this case we need to find out what devices, second thing what we could do is preventing things like NROL-39 Kraken... third thing we can do is to teach people Psychology

Industrial Automation

Inventor: Romanos

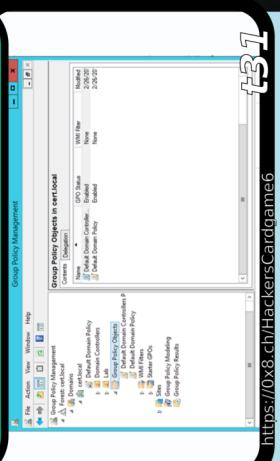

t33

Year: ~????

If a person has to do all day the same, it is likely that these moves are burnt into his psyche (not even an implant required) if you would give a stimulus (eg. high noise sound at 15kHz, 16kHz, 17kHz...) you could link this move to a stimulus. t2, t11, formula see m76 Card. So it would be likely that not only people like me that worked in robotics (t22 Card) are affected.

It would be the same like m70 card or in combination with m70 card.

Group Policies

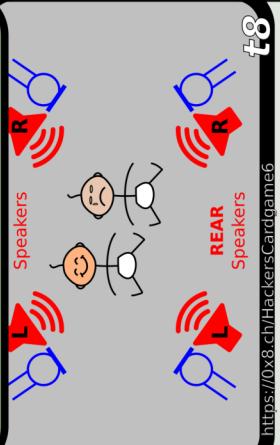

Inventor: xxxxx

t31

Year: ~????

On Windows you can deploy group policies to a complete domain. People that are some sort of wannabe hitlers would enjoy it to impose their will upon others. I felt also cool when i was about 25 Years old that i am the "Master" but in fact i was just the scapegoat. Not quite sure if those who deploy things like a16, m50... to people or to a complete group of people are just older people that are using some similar software or eg m50 card is deployed on all domains, eg by the NSA/CIA/DSMs. Giving a young whitehat hackers drugs like zyprexa or illegal drugs (GFYS Matrix Red and Blue Pill) would let them to think, i must have been infected when i ate this.

Quadrophonic

Inventor: JVC

t8

Year: ~1970

Maybe directly built into the apartment walls, if you would play a gun-shot sample (see card m21) could drive the victim paranoid. Quadrophonic or even Octophonic in building with multiple floors would cause the mind to interpret the sounds as authentic and make neighbours fight each other

Building ControlUnit with 1990 Technology:
2x Gravis Ultrasound Stereo
2x Sound Blaster Stereo
4x LPT & JDAC / CENT_DAC (see t9 card)

For Therapy (a2 Card). But unfortunately also to make people aggressive to force them to fight against each other :)
