

## NUCLEUS ACCUMBENS

b3  
<https://0x8.ch/HackersCardgame5>

Year: B.C.

**Inventor:** God  
The nucleus accumbens (NAC or NAcc), also known as the accumbens nucleus, or formerly as the nucleus accumbens septi (Latin for nucleus adjacent to the septum) is a region in the basal forebrain rostral to the preoptic area of the hypothalamus. The nucleus accumbens plays a lesser role in processing fear (a form of aversion), impulsivity, and the placebo effect. It is involved in the encoding of new motor programs as well. Not sure if this text from en Wikipedia is correct, having a medic for that would be great.

## EEG / FLASH QFIRE?

b4  
<https://0x8.ch/HackersCardgame5>

Year: 1900?

**Inventor:** Satan

I did not find any image from such a device. In Psychiatrie Königsfelden (P4) there is an EEG installation. They measure your EEG with electrodes and in the same time it produces flashlights with a stroboscope. **The flashlight cause peaks on the EEG!** Unsure if that was "service" of the mental institution and they just tried to find out my perceptual threshold. The problem was that someone used this scene on the street or in my car and also flashed me, that revictimized the scene in the Mental Institution and made me massive paranoid. I dont knwo if psychological terror on the street was intentional or this was that just that eg the CIA stole the data and abused it against me. Question would be, what could one do with massive blade-server && IEEE1588, eg. t1 card and a techno-party where many young people go to.

## Phylogenetic Tree

b5  
<https://0x8.ch/HackersCardgame5>

Year: ~????

**Inventor:** XXXXX  
to find common ancestors. In my opinion people tend to focus to much on their genetic material, but knowing that we have lobsters as common ancestors and that they usually fight against each other to get the girl-lobster would be of use. mankind calls itself "intelligent" but follow these old lobster habits is maybe not that intelligent: Sorry German: [v=H6Z36Z\\_LCwU#t=30m00s](https://www.youtube.com/watch?v=H6Z36Z_LCwU#t=30m00s) A mad "scientist" maybe used swiss mental institutions and the #Verdingkinder for genetical engeneering. If one of the victims would find out that this would be true it would maybe have a lot of trouble, they also would like to know what sort of genetical material works best with eg t1 card

## 5 Monkeys

b6  
<https://0x8.ch/HackersCardgame5>

Year: ~????

**Inventor:** XXXXX  
An urban legend explains, that if you put monkeys into a room with bananas on top of a ladder and punish the whole group (**Behavioral Sciences, non-consensual**) if one of them wants to get a banana after 1000 repetitions the monkeys then would attack that monkey that tries to get a banana. If you project this behavior to **Foucaults Dispositif** (see German Article: Internat Foucaults Theorie gesellschaftlicher Macht nimmt die Sexualität eine zentrale Position ein (<https://de.wikipedia.org/wiki/Sexualit%C3%A4tsdispositiv>) and would cause pain to a group if one of them touches wiener (for example with Big-Data, b1, t1, t1.2 cards) they would attack the kid that touched his wiener. This turtle comic (upper right corner) would imply, that this algorithm even crosses the line of generations. Crossing the line would cause the younger generation even to commit suicide since this socio-psychology-design-pattern then transmits pedophile parents that want rape the kids.

## HYPOTHALAMUS

b1

<https://0x8.ch/HackersCardgame5>

Year: B.C.

**Inventor:** God  
The amygdala also corpus amygdaloideum: Latin-*amygdala*, is one of two almond-shaped groups of nuclei located deep and medially within the temporal lobes of the brain in complex vertebrates, including humans. Shown in research to perform a primary role in the **processing of memory**, decision-making, and **emotional reactions**, the amygdala are considered part of the limbic system, NOT VERIFIED BY ME SO FAR!!!

Development / processing of anxiety, fear and anger, "fight or flight" - understanding or manipulating reaction, "rage", possibly

## ENDOCRINOLOGY

b2  
<https://0x8.ch/HackersCardgame5>

Year: ~????

**Inventor:** XXXXXX  
The (neuro)endocrine system is highly complex. So one can influence behavior and health with homeopathic doses of chemical substances, but also with behavior or radiation. For me it is to complex to understand and im not sure if a doctor in endocrinology completely understands what would happen when you change just a small element in the complete system. If there is such a AI that helps the doctors to make patients healthy again it would maybe also subect to attacks. So hopefully some doctors are hackers too. I dont know a lot about medicine, but when i asked @unibas if they had a look at the insulin pumps they recommend to their doctors and students they did not answer. That was a few years ago when CCC talked about such things.

eye1

<https://0x8.ch/HackersCardgame5>

Year: ~????

**Inventor:** XXXXXX  
Maybe "in the far future" we could be hypnotized by a QR-Code since the Neuralink would dissociate one by a specific QR-code. Callino one insane or schizophrenic would maybe help to hide what they have done to him. on the back of the ccd Sensor you could even have a small LCD for triggering things. (Stimulus-Response-Habits). So if unsure about that: **CLOSE EYES WHEN TYPING PASSWORDS**. Even if a medic does such things in hospital and sterile environment, you could lose permanently eyesight. So maybe not the best idea. Workaround for hacked RetinaCCD would be to jam the frequencies used by the RetinaCCD. Another thing would be to find eye central Server (CIA NSA?), then one could prove that this system is bidirectional that they stalked Marc Jr since he was a 13 years boy old in Aarau BEZ (Écriture automatique). The cams that were installed by Alina AG would therefore be the scapegoats that distracts from this card, and that e.g. INSERT: 1960s parents stalked their underage kids even in their beds. More relevant they use Photogrammetry to create m89.
