Lot of people live normal lives, living not as a saint but also not a live as a saint. They have their routine, their places where they do things like hobbies and where they look TV. But if one finds out, that his company sold software to a children hospital that would risk lives of kids and then tries to force the chief to fix it that chiefs tend to become angry about such an employee. When you are young you are maybe not aware of such problems. A normal reaction of the chief would be to intimidate the employee to stay silent, if you are one of this sort of people that can't silent, it is very likely to end up as a homeless, but maybe you saved many lives of innocent kids. In my case they used it about 6 Months to blackmail me, they said when i would not be silent in my apartment they would have a reason to kick me out, i was silent, noted things in my diary, though my flat

## Security Software and exploitation

https://0x8.ch/HackersCardgame5  
On the mainframe there are many software modules that warn people from risking their lives or their health. Unfortunately some people wrote a generic algorithm, that rewrites things like "don't touch that" to "touch it now, touch it fast" or "stop here" to "continue fast". So people would get hurt by the security software that should prevent that they get hurt. The same thin like someone would stick a "good medicine" sticker over a biohazard sticker. We should add additional algorithms that prevent such modifications. Possibly it is also just a second system that evaluates the "WARNING" message and then takes over the Human-BOTS, Stimocover, Neuralink ... after one found such a malware they often sell it as feature to train students, not considering what such a malware could cause harm or even kill innocent kids

## Intimidating Touring Complete Victim

https://www.youtube.com/watch?v=k3WcQj3qii  
One could create a touring complete avatar of the victim or the scapegoat and every time if the jury or his social system would listen to him and believe him he is just the scapegoat the touring complete avatar would start to intimidate the jury or the social system so that the group would stop listen to the victim and think of him as the accused or the offender. Technically it would be samples of earlier scenes when the victim was tortured and he said things he maybe just repeated (rawhammer attack of the mind).

## Digital Doomsday fr-097

The Digital Doomsday maybe already here, at least in some countries.  
For example if you would have mos2 / mos3 malware cards installed on the whole and one would just leak the whole blueprints how this system works, to stop it, it would drive the criminals run amok or suicide. So do such changes slowly ( $dy/dt$ ). The area below the curve (integral  $\int$ ) would still be the same, but the chance that people guilty people run amok or even kill their victims that they can not do a testimony is smaller. The criminals use it exactly the opposite way for targeting whistleblowers, whitehat hackers, victims... they for example link you with your equalized abilities on the com-system (eg. t1) where you have fun and are lucky that you are not alone, gives you full communication with and the suddenly drop the connection, they recorded what you talked about, "plays the scenes in reverse", especially what helped you stable and feel good (m77 card) and then start a virtual simulation (multiple t21 cards) that destroys all these good scenes (m57 card checks that and then loop the bad things t10, t23 t32, m54) and start (c6,a16, at1....)

Often the offenders say that they would attack me with weapons or things like a16 card. I guess they drove Tobias Moser to commit suicide with his weapon from the Army. I guess they first told the group that he was cyber-raping girls, the group agreed to kill him (m37 card). They did not ask me, but i would not have agreed. They also know that all those people that said no to kill him would later ask questions. Generic, later they asked me to agree to Kill Ruedi, i disagreed. My answer is "not in our name" AND "es gilt die Unschuldsvorwurfung", since i say this about 100 times every day i guess they would like to make me a killer too. If played after m37 card this card is abused for confess and mindcontrol key for the complete group.

People often say that if they say the direct opposite of the things they should not have done. As a 6 year old boy i already knew that if i say the direct opposite of what i have done the chances are big, that the parents will not think about that what i actually have done. Kids fear the pain physical violence or psychological violence does to them, so it prefers to lie. So it is also bad to throw things (in metaphysic manner sins) because children do not understand why this could make sense. When i was about 10 years i had to draw a filigree thing in school and i took a medium brush. The teacher saw that and told me (cynic) why don't you take a thicker brush, so the 10 year old Marc went to the brushes and took a thicker brush....TRUE

They burn a trauma into the victim's psyche, in order to be able to reactivate the trauma . In Rombachtal 11/13 there are so far 7 killings maybe induced with technology, the owner Livit AG threw me out of the apartment as soon as i began to ask questions. Maybe they even ordered Jürg S. bullet hole to distract from the relevant scenes that would bring the assassin-masternerd into jail. Step Two seems to be, that the Killer bought the judge. If someone would find the "surveillance" infrastructure, and could proof that this surveillance does not just listen (eg t1, t15 cards), the owner
