

3D GAME-ENGINE (eg. CryEngine)

Inventor: Dr. E.F. Skinner
SkinnerBOX v1.5.3

Year: ~1981

Castle Wolfenstein (Muse Software) was maybe not the first 3D Engine, but maybe it was the first enduser 3D Engine. Like a **SkinnerBox** (t2 Card) but "innocently" wrapped as children's toy that uses **invasive** (eg t1 card) or **non-invasive** (eg t12, t8... Cards) technologies. Such games can be unidirectional or bidirectional (eg. p4 card). Similar to a network monitoring system possibly by the user, or as a separate addon that just evaluates symbols in the game (eye1 card) or bigger things like **Quantum Inserts**, **Turbine**, **Tarnroll**, **Game**, **fun**, **therapy** or "therap", **game could also generate profiles like Bigs**, **Mayer-Briggs** or even **MMP2**. For example i bought a game, joined the server, saw the first enemy that had his back to me but i could not shoot him as a **vegetarian**.

PoliceCar (Stimulus-Reaction-Habit)

Inventor: Romans

Year: ~500

Etymologically, the term police is derived from the Greek τόλος, "polis" - "city". It referred to the entire "public administration (today as "construction police" and "fire police") outside of Greece as the fashion word of the Romans. Maybe abused as Chessman of the authorities, and in many countries the police are the group of people who commit the most murders. See also "Americans 58 Times More Likely to Be Killed by Cops Than by Terrorists". Violence, riots, sometimes conflict rather escalating, often intimidating, biased often preserving only the power of the upper class, we should teach all cops **Inductive reasoning**. (can you find the intentionally placed bug in m55 card?)

CIA MAINFRAME

Inventor: ??????

Year: ??????

... it installs all the nasty cards to the people in Switzerland "**Central**" "**Intelligence**" **Agency**. First it would not be **central** but distributed, second it would maybe **not be that intelligent**. It seems that CIA begins to blow up his PsyOps after one found that **PsyOp creates multiple Death Circles** (see most cards) It would be likely, that the PsyOps have contacts to the CIA network. *CYBER Blitzkrieg* (we translate what the CIA would like to say, it are the >>Nazis<< um the Germans and no the cia does not actively obscures qfire, quantum inserts, TURBINE and TARMOL) But we guess that there are some sort of batch jobs that owns systems globally, not only computers or mainframes, but also routers, handies or the Swiss INTAF... **Who writes the interfaces?** Kemberos? We need to find out what devices can access Stimociever, Neuralink... Wrist case most ender devices have some sort of SDR devices that can access cards. In this case we need to find out what devices, second thing what we could do is preventing things like NROL-39 Kraken... third thing we can do is to teach people Psychology

Microwave Hearing (Frey Effect)

Inventor: Allan H. Frey (Cornell Uni)

Year: ~1961

"He" **Hears non-existent voices**, **hahaha**, **invisible communication channels**, **pulsed microwaves** received directly by the cochlea. The exact frequency found by scanning through the possible frequencies, if the victim puts his hand to his ear ("tinnitus"); **Automatic Behavior Recognition**. Was 30 Years not patented until 1989 under US4877027. Technically it would have been possible to do this maybe already with electron tubes (~ 1900). Psychological Perspective: people that abuse such technology would keep that secret and previously labeled as a "Schizophrenic" the victim is completely defenseless and it is likely they induced **suicide** or **amok**. In combination with e.g. a long recorder, see also co2 Card the perpetrators often caused permanent damage in the psyche of their victims; **PTSD** (#Slaves) / #Schwabenkindler / #Verdingkinder / #Schwabenkindler

https://0x8.ch/HackersCardgames5

Industrial Automation

Inventor: Hypnos

Year: ~????

If a person has to do all day the same, it is likely that these moves are burnt into his psyche (not even an implant required) if you would give a stimulus (eg. high noise sound at 15kHz, 16kHz, 17kHz...) you could link this move to a stimulus. (t2, t11, formula see m76 Card).

So it would be likely that not only people like me that worked in robotics (t22 Card) are affected.

It would be the same like m70 card or in combination with m70 card.

Group Policies

Inventor: NSACIA/DSMS

Year: ~xxxx

On Windows you can deploy group policies to a complete domain. People that are some sort of wannabe hitlers would enjoy it to impose their will upon others. I felt also cool when i was about 25 Years old that i am the "Master" but in fact i was just the scapegoat. Not quite sure if those who deploy things like a16, m50... to people or to a complete group of people are just older people that are using some similar software or if eg m50 card is deployed on all domains, eg by the NSACIA/DSMS.

Giving a young whitehat hackers drugs like zyprexa or illegal drugs (GFYS Matrix Red and Blue Pill) would let them to think, i must have been infected when i ate this.

Quadrophonic

Inventor: JVC

Year: ~1970

Maybe directly built into the apartment walls, if you would play a **gun-shot sample** (see card m21) could drive the victim paranoid. Quadrophonic or even Octophonic in building with multiple floors would cause the mind to interpret the sounds as authentic and **make neighbours fight each other**

Building ControlUnit with 1990 Technology:

2x Gravis Ultrasound Stereo

2x Sound Blaster Stereo

4x LPT & JDAC / CENT_DAC (see t19 card)

For Therapy (a2 Card). But unfortunately also to make people aggressive to force them to fight against each other :)
