

## EventTrigger

## Loop Recorder Part 3

## Infrared Ray Weapons maybe in every Display

**Inventor:** ?????? **Year:** ?????

In my opinion this terror attack against me uses the m123 card **acid in my body lotion** -> seal the closet  
- infrared laser  
-> maybe in a car display, add polarization filter  
- active denial system(s) that roast first layer of my skin  
- maybe in combination with chemicals on my skin or chemicals that was put into my body lotion, or even both (even 3 factors)  
-> no solution yet

obfuscates with chemistodes that stitches that seems to be placed in the skin / face too

## Antenna (Wasserflue)

**Inventor:** XXXXX **Year:** ?????

As seen in Battle Filed Bad Company 2, the m-com station is shown as small box, but it would be more likely that these are big antennas like the one on the "Wasserflue" (in Kitztigen near Aarau)  
Maybe one should find out the power the antenna uses and how strong the "drum-antennas" are and if it would be enough power to activate implants (maybe just a golden wire with lambda (other Antenna card) to drive people insane or even drive tobias moser to commit suicide with his military weapon (as far as we heard))

NOT YET PROVEN

## Event 1 Event 2 ... Event n

**Inventor:** ??????? **Year:** ?????

Specific Events can trigger Actions. GPS Data, Data from acceleration sensors in handles (for example specific roller coaster) Events could be Sounds, turning on Light Switch (maybe evaluated by smartmeter and the a list of what device uses how many watts, images, Automatic Behavior Recognition, websites (urls), Buttons or Mouse gestures on a computer, Handy or even if you draw a circle with your hand in the air. One can recognize events with AI (Pattern Recognition, Deep Learning,...). For Example if Jürg S. would have fired illegally with a weapon, this event would have been recorded and caused an event in a Gunfire locator system [1]. Concerning Urs B. (statement not verified yet) are the 1960s those who programmed the triggers against marc jr landolt, after they programmed those triggers they run in auto-pilot mode and they cant delete it (auto-pilot = an allegation)

## Crime Scene 3D Scanner

**Inventor:** XXXXX **Year:** ~????

Like t10 or t23 a game engine (here Blender 3D) is also some sort of t7 Card, but it's not just a loop it are more event-triggers (t14) or state machines (coil), for example if I leak about this sort of things a16 card is being activated against me. They often use an event in real live to create this story, you would focus on the initial scene and the person instead of technology. And possibly with AI / Deep Learning (a11 card) prerendered AI or genetic algorithm that learns. The card is in neutral gray, because you could use such technology also for good things but in my case they abused it more like **weapon** or "white" torture against me, that wants to kill. Book Ereboos. The algorithm would maybe also try to **isolate whistleblowers and whitehats** that could be as simple like an inverted F=TV5r Card (Alex Wissner Gross) formula, not keeping all people connected but isolate some or even all.

## M-Com-Station

**Inventor:** XXXXX **Year:** ~????

In my opinion this terror attack against me uses the m123 card **acid in my body lotion** -> seal the closet  
- infrared laser  
-> maybe in a car display, add polarization filter  
- active denial system(s) that roast first layer of my skin  
- maybe in combination with chemicals on my skin or chemicals that was put into my body lotion, or even both (even 3 factors)  
-> no solution yet

obfuscates with chemistodes that stitches that seems to be placed in the skin / face too

## Skinner Box

**Inventor:** B. F. Skinner **Year:** ~1960

Over electrodes on the floor he could give the mouse electroshocks = punishment / create aversion By pressing the Button the mouse was rewarded with a biscuit = reward / incentives / reward ☺ a2 card Skinner searched for sequences of **incentives** and **punishment**, to completely remotely-control test="object" caused long-term damage, if you are being subjected to such experiments talk about the details with **equal aged people** you **trust**. If you tell eg the Police they just diagnose you eg Schizophrenic and would put you in a mental institution where historically a lot of such illegal human experiments were made, eg. Burghölzli, guess today (2019) the abuse refugees. #VerdungKinder, #SchwabenKinder, not loved Childrend (often the oldest male), Soldiers, ... generally people nobody cares about, we as a society should act and speak what we know about.

## Active Denial System

**Inventor:** US Air Force **Year:** ~1980

The Active Denial System roasts the top layer of the skin at a distance of 50cm. For a range of 5m logically more than 100 x smaller, small enough to fit in a cell phone. Actually, 1930s electron tube technology, but today you can do this also with semiconductors (Esaki-Tunnel diode). Maybe one could do the same thing directly in the CPU with Army-Grade Crypto, since the radiation power reduces to the square of the distance, it would be quite small. The "Active Denial System"-denialer would thus be the natural arch nemesis of a TinFoil-hat. At a range of 50cm one could terrorize lodger and if it would have been coupled with the victims computer and there are additional some algorithms, one could drive the the victim insane, drive to commit suicide or make it even run amok. See cars: t1, t10, t11, a16, at1, b1, e1, e5, m13, m19, m32, m46 ☺

## Skinner Box

**Inventor:** B. F. Skinner **Year:** ~1960

Over electrodes on the floor he could give the mouse electroshocks = punishment / create aversion By pressing the Button the mouse was rewarded with a biscuit = reward / incentives / reward ☺ a2 card Skinner searched for sequences of **incentives** and **punishment**, to completely remotely-control test="object" caused long-term damage, if you are being subjected to such experiments talk about the details with **equal aged people** you **trust**.
