

Separating one sheep from the herd

m68

Inventor: XXXXX

Year: ~????
If we use sheep as a metaphor for kids or people, **satan** tries to **separate one sheep from the herd**, as a hostage to blackmails the other sheeps (m44) or if this does not work they use the next dirty trick and say the "black" sheep is e.g. a "Rapist Terrorist" (m41 card), then they would even kill the "black" sheep (m46), eat its goods and then blackmail the other sheeps with the **dtl** card, telling them that it's their fault, because they helped separate the victim. If they can make the other sheeps agree in judging the "black" sheep with m37, card the group would feel guilty (even when they not killed it) so they normally would declare a new "black" sheep that told the other to separate the victim, **and the dirty game would go on on this way**. The **Term Sheepie** even makes the victim think that he / she is better than others that could stay in the group...

Skinner-BOX & Leheng(ger), Part 2

m70

Inventor: XXXXX

INHO, **cars are Skinner-BOXes** too. A lot of electronic Equipment in a car. People that uses a Car are being programmed while **driving**, this is suboptimal anyway. So we need to declare all Car Drivers to **MKULTRA Killers** as long one can not prove that he is not. Urs B. knew about that, he said in 2002: "All Cars with Antennas are remote controlled" This would mean since he kept this secret he is partially responsible for all People died in Car Accidents. He used this knowledge to show-off "his greatness" to his daughter but not to save the victims. **MKULTRAs would get some benefit for driving a car, some sort of m15 Card**. So the term "Car Hacking" is also an overloaded Symbol. Technically it would be some interface the user that uses the MKULTRA would not know. t1.... Card and eg some personalized map where the MKULTRA Bot would get the **Stimulus: Go to place 23: My Father sold my car, i feel better now and its much better because of CO2.**

Cyber red pen

m85

Inventor: XXXXX

I guess there is some sort of electronic red pen where the offender can change things in text I wrote. The principle is quite simple, For example writing *TERROR* all over the text and then additionally activating an Active Denial System / Amygdala, one would not be able to read what the person who wrote the original text would like to say. Not tested so far. Workaround would be to use color your own in the text you write, it then would be possible, but much harder for those that uses this dirty trick.
Technically one could implement that with things like t1 card, or if you would know how many words a person reads per second you would for example send the word you would mark with a high frequency sound just above auditory threshold... Maybe this technology was one invented for good, to help children in grammar or orthography, bad people possibly use it for the contrary effect or to make important texts like protocols in criminal cases unreadable.

Pre-Detection of euphoria and pain of certain information

m113

Inventor: XXXXX

The Psychiatrists tend to give normal people only information that causes euphoria and filter that information that would cause psychological pain. Technically this would be Natural Language Processing and Patter Recognition Algorithms. All the sins people should confess and atone stay hidden. It would save lives if people would confess and atone. Snobbish overreaction one single bit of truth about their sins would cause rage and even make the sinners run amok. **This is a military thing** in Boy Scouts Araau where many armed Officers have grown up the Srink can pop the all the "bad trips" by using his voice-key "Spontane Entladung" and people like Urs B. would run amok overwhelmed by the facts that **he almost killed Marc Jr.** It is even more worse if the shrinks helped those armed sinners to sue their victims or kids. Suing the victim (suing Marc jr) was therapeutic for Urs B. but in the end the problem just got bigger and forked to the prosecuting attorney, autopoeisis.

Pink Unicorn-Pony

m31

Inventor: XXXXX

I hear, that i will be punished death by an equal aged girl if i continue writing the text here...
so in this case the equal aged girl would maybe add the text here later or on Layer8 (Iso-Osi Model)

Preparation of Psy-Triggers

m127

Inventor: XXXXX

The people seem to add psychological bombs to the victims or the whistleblowers. And seem to sell the igniting device or codes to the people that would go to prison because of that leak. So they might be some sort of business or trading platform. As soon as one would become a whistleblower all the small criminals would see a business model, and the people in power would of course buy the access codes for this sort of psychological booby traps. What do me since at least 2002 is definitely not fair play. Aber das wissen die doofen Weiblein • scion lange: "Shadows of materia condense". The most powerful terrorist in Arau seems to buy all the booby traps and ignite them at once, so he definitely wants my death. And all those that provide him with such sort of psychological booby traps would then be part of the terrorntzwerk. **Autopoeisis would be a problem here!** Maybe it are some alcoholics that hate themselves that have access all (?) to communication systems
