Somone grown up christian monogamous that is 100.0% true could easily be owned rape of his/her girlfriend, if t1, t1.5 cards were not used or he/she would be an at1 card out of the ones who would be 100% monogamous. So we guess this is known vulnerability exploited since decades by the military or at least own them because autistic people would want to find out everything and become whistleblowers. If they would succeed with "theraphy" against his monogamous behaviour maybe then his friend would then be suicidal too, see m15 cards (last line). The red part has deleted maybe something like with inverse-m17 card. After that "ritual" I've seen her everywhere, maybe they sent intentionally archetypes that looked like her. They also used computer to keep that stimulus active. If her name would be Claudia Bauer and her the name of her first friend was Christian Reich they would send CR, RB, CR... on Social Media and marked this with cyber magic marker && activate b1 card. Without this card they can not play m79 card...!!! m38 & Autistic monogamous => Rage Porn = Weapon

Marc found strange behavior in the LAN in Altstetten (ABB,1999). he guessed this must be CIA footprinting / enumeration for world domination. They attack 20 years old Marc with illegal drugs declared him schizophrenic/discriminate/discredit / isolate, planning / calling him a rapist. They did experiments with him to force others to commit suicide, but that's not marks (fault)

Also some sort of Limbic System Vulnerability Hack, our brain is susceptible to the cute appearance of children and reminds us of our (happy) childhood with equal aged kids. This is "used" by advertising as well as by people like Epstein that possibly used the victims to get influence in politics, science... Sociopath spokon: It is about "Wahnmummspsychologie", the shape of the head, which also reminds us of our classmate in our childhood. Sociopaths ignorantly don't care about children future, if they can sell more junk they will even roast a child (maybe "only" with an active denial system of course) if they just can make more profit... this is a blue card with a kid, but the kids are the victims not those who abuse this principle.

In videos you will hear often "project paperclip" but seldom a detailed explanation, "project Paperclip" definitely would be a honey pot or a database trigger, so be careful if you google it. Wikipedia talks about 2200 German Science Specialists and it talks about eg. about V2 Rockets (that is a strong image and maybe supposed to induces fear). We guess that those 2200 Scientists built some sort of Mainframe with a virtual model of the world in 3D or at least from the civilized world. There people can add eventtriggers(t14), or use Cyber-fluorescent-Pen (m84, m85) to manipulate the masses, stick things to documents like people do with paperclips, easy to understand, no explanation needed, and the users that use it are then used to target for example whistleblowers that would like to expose that system. **Hacking Exposed**, First edition: "A network with a security vulnerability is insecure to those who know about the vulnerability..." I guess there is some software on the communication systems, that can identify common sentences a person says within less than 1 second and then plays the same sentence of an equal aged friend would like to say to you with the voice of an old pedophile person. If the Aversion Archetype even cyberraped the young person this would revictimize him or her, maybe even making her doing a suicide (attempt). The people doing this listen days or weeks until they have some sort of a touring complete avatar (NSA/CIA/tatartatentation?) for voice, then it is maybe automated until the victim is dead. Maybe also in context with pedophile people that want to rape their own kids. Would destroy good situations with equal aged, because the kid that is being targeted would try to commit suicide and the other kids would disconnect to protect themselves. So they isolate kids for c6, m4, m32, m42, m02, m03 m04, at1, other kids would get dt1 card, unknown: we must patch that somehow.
