**Proximity sensor(?) ⇒ Stimoceiver (t1) ⇒ Amygdala Implant (b1)**

**Inventor: xxxxx**

Groups of old pedophile looking (german: glupschen) women that seems to know my positional data, even if you have no electronic device on me. Maybe, **RFID** in the **Creditcard / Surveillance Cam or Shopping-Mall**. They seem to enjoy to hassle you, more worse if you have epilated your thing before the legs day before. They target your sexual integrity, because one epilated shaved "maybe" for an equal aged, not for old pedophile **zobies**. Possibly they get **broadcast message** "familiarized at <your positional data>" "Human"-BOFs seem to be driven by their **limic system**. The fact that they know what you did privately drives me insane. For me as a 40 year old Man its quite annoying, but imaging **this must be for a 20 year young woman**. That makes you behave paranoid and Insane (-m19)? Behavioral Science & Marketing young to old to young (m7,m8 card). We should add **Automatic Behavior Recognition** Sociopedia-Designpatent at least for the young girls so that they are not thrown in the group of old staring pedophiles, but in the group of equal aged.

**Year: ~???**

**Inventor: xxxxx**

Even if you did not consume m133 Card, they unfortunately put old pedophile people into your bed, apparent, on your body sometimes just an avatar, sometimes real connections (m98 & m99 card) to rape you, or to make you run suicide or amok, but in fact the NSA/CIA wants to distract you from SIGINT / COMINT and HUMINT Concept Knowledge. During this scenes they activate things like b1, t1, t15 to make you even rage more. Maybe Mail Attachment. **It is abused to force witnesses or juntes to do false accusations**, It is ok for me, if younger people dont help me or older people in the face of attack, but putting an innocent person like me into **jail or a mental institution is not ok**. In this case i / we can not protect you anymore because then you are already part of the problem. We we could rescue all equal aged and younger people, since we know that now, we need a method to protect the complete social network (COMINT (SIGINT) or the **whitestar hacker / whistleblower** and maybe his/her shrinks if they are younger. "Firewall1? (Vorsatz),"everybody is good enough" (later m133?)

**Seductive Coercion PART 2 (molest with old people)**

**Inventor: xxxxx**

**search detection**

<https://0x8.ch/HackersCardgame6>

**Inventor:** **xxxxx**

They seem to have some sort of function on Simoceiver, Neuralink to detect if you try to find something. That activates an eventtrigger that then samples the person you fear most (Phisterer) say things like:  
 - Suchen bis gefunden (mil Retorhical Automatism)  
 - HAHAHA, I hold it in my hand (+video Sample)  
 - What does he want, HAHA  
 (additional b1 card is activated with the sample)

Especially annoying when they do it if you try to find your sex toys... prerequisite maybe m98 card, often plays loop that makes you search always the same places triggers multiple times, c02>a16 In my particular case they seem to have a fetish triggering that in private life, maybe they hope, i would not leak it then... as you see, i would "not" and if you talk about that they even begin to render things on your sex toys, that suxx even more

**m125**

<https://0x8.ch/HackersCardgame6>

**confessional (to confess)**

**Inventor:** **xxxxx**

We guess the NSA/CIA works with the principle of seduction. He gives the people the opportunity to get money if they sell their soul, or if they sell their soul just a little bit. With **BigData** and 100 Years of DataRetention **they would know about the smallest sin**. They used m66 Card as Scapegoat.

One working hack to work around this principle is to **confess** what you have done. Me for example I drove drunken car and did other things, so I tried to turn myself in, but they said that this sins were expired. From that point in time the NSA/CIA System couldn't blackmail me with this sins anymore, unfortunately they then began to shoot against my sexual integrity.

**Consumer Note:** **Nun not included in all use cases.**

## giving Multiple Reasons at the same time to poison elaborate facts

**Inventor: xxxxx**  
If you would have some "unseen" communication channel like USART07 or Stimociver or Neuralink and something happens like your face suddenly gets burned (see m121 Card) then there are many reasons given why this happened or how this happened. Often only junk and spam that would lead you into the wrong direction. Take a pencil and paper and note all of them down, some of them you can eliminate because there are mistakes in that reason. some you can not, but if you note all the claims and then it would be easy to find the pivot element (Pfisterer&Urs) since people tend to use often the same chess pieces and moves.

The CIA seems to put disgusting (igitttt) Pictures on relevant information (Cold War era Intrusion detectors...) that can detect movement up to 300 meters This normally leads to avoidance to inform yourself about what they inform the people who know and abuse this dirty trick.  
And it would be likely that eg in the picture, in the EXif Data or in a system where only agents have access would be less disgusting content but more informations.  
<https://twitter.com/Status11892504632768548>  
(and it would also be likely that this tweet would disappear or would be changed... but you really don't want to click that link)

**Induced Avoidance Behavior**
