If you ask Google ADBL means "Ad Blocker" but maybe it has another meaning. But maybe it's for those who have the bad luck not to having own kids. But if you have kids people maybe would think you are pedophile. **Important:** make sure that the **comment** does not make your partner think you secretly married someone else and have kids with him or her. **So only click that with equal aged, and only then when you are 100.0% sure that you are not pedophile and never will become pedophile.** see cards m41, r45, m37 and a16 if a15 and the group would get dt1. But playing with only one equal aged sane and consensual with diapers maybe also helps to process things that went wrong in the (early) childhood.

As far as i could find out the NSA/CIA try to seduce you into the NSA/CIA to find young children. They render them even into your bed tell you that you can rape the younger girl now. If you are a person that keeps the promise you gave your first girl, you would stand up from your bed to prevent that scene. My co-worker at the ISP Ziknet Sabrina L. was shown in my bed for having sex with me, but I **immediately stood up and protocolled to my diary** "Sabrina L. would like to cyber-rape me" and smoked a cigarette and did things not in context to sexual integrity. They changed my diary to "I want to cyberrape Sabrina L." kicked me out of the job and put me in a mental institution. If i would have said yes, then they could play m134 card with "you consumed, so you is legitimate that you are now the most powerful", i could only find out because i did not. With this chess move they can easily drive uneducated people to kill an equal aged m37 -> dt1. That was about that time where i began to ask questions if the former chief of ISP Ziknet committed suicide because of NSA/CIA in ~2006

## Borg Hive (Infection & bursts)

There is a scene in Star Trek, where the federation tries to find frequencies of the borg hive, i don't like Star Trek because it are simple Dressed Soldiers that promote hierarchical systems, but this is a good scene. So if you would imagin, that many people already had some implants like neuralink, that then the process to find a user would be some sort similar to that Star Trek scene. In real world it would maybe more complicated, since it would be a many to many relation. Many sources, many sinks. Simple domain model: If you would take analogue devices one could listen or easily inject things. For example if i would say: "I love you Claudia", Urs B. would inject "Spengtallien gegen Marc Ir aktivieren". If he would do this with small bursts, different antennas it would be hard to deactivate that Terrornetwork. A big Problem would also be, if the are **backup systems** that are 99.99999% of the time silent, eg implemented as **Autonomous system (Software)**. Things concerning Tobias Moser (m37) seems to be such a backup trigger: API::Moser loop("Claudine betrayed you with moser" & t15...)

Eg. the flat-earth theory is just stupid, or maybe just a parable for Terry Pratchetts discworld novels, which tries to explain small and big kids in an understandable way, how a social system "university" works, and that some people trying to steal the Boots of other magicians. Maybe it also describes how Mainframe (AI's) work, in this case the chained Octavo which contains 8 spells (access keys). Or e.g. The librarian (Google) who has been transformed into a monkey => see Google-Query: Porn. Maybe you should read Terry Pratcheds work...

## maximum profit Algorithm

m80

PsyOP

Inventor: **xxxxx**

Year: ~????  
The old generation seems to have some sort of Algorithm that calculates the maximal profit of an action they force to do a Victim. For Example if the **Victim (V)** would make a graphite to tag an offender as Rapist or Murderer they would make him do that, but they would record that scene, then Judge (O1) would start a criminal case, making profit with the law system. The owner of the building (O2) would get money for damage the victim (V) did, the painter (O3) that redraws the wall in white would get money for that job... An additional "feature" of such an algorithm would be that in the end the Victim would be sentenced, shown in media as criminal, nobody would believe him and nobody would talk about the equal aged kid that was raped or murdered, so the real racist (O4) from the old generation and the person that has access to this algorithm (**PsyOP**) would be the main problem. **unknow: Weeks and discredits the Victim that knows about the rape or the murderer, intentionally?**

Most children are "shipped" with items / behavioral patterns (or maybe it's just a technology card) to make noise. Satan then uses these functions (stimuli-response-habits) to terrrorize relatives, targeted individuals. They play eg dt1 card on the parent and then activate the rattling function on the kid. In the end parents would hate the kid or one of them = psychological Warfare. The child gets "incentives" when it uses such functions and is not aware about the effect to victims, see m11, t11... cards. To intimide the victims (who do not directly see where the "chain rattling" comes from), The Child: "hey, making noises (unheard: then I'll be less ignored and incentives)"

## YOU are SCHIZOPHRENIC!

Inventor: **Satan / Eugen Bleuler**

Year: ~????  
N. Lat.: morbus dissidentiae phreneticus, also known as Bleuler's disease, Differential diagnoses: autism, developmental disorders, dissociative identity disorder (in passive), delirious (judging?) Depression, injuries, tumors in the brain, various forms of dementia, confusion, disorientation, psychotic states, Borderline personality disorder, random personality thoughts, pernicious anemia, induced disorder #MULTRA.  
Marc found strange behavior in the LAN in Altstetten (ABIB,1999), he guessed this must be CIA footprinting / enumeration for world domination. They attack the 20 years old Marc with illegal drugs declared him schizophrenic/discriminate / discredit/ Isolate / planning / calling him rapist. They did experiments with hum to force others to commit suicide, but that's not marcs fault

## Pädo Plagiats Algorithmus

Inventor: **xxxxx**

Das System verkauft das was das 1980er Kind sowieso tun würde (z.B. das erstellen dieser Karte) dem 1960er Pädokriminell als "du hilfst dem kind muss dir Tierschaft weg zu 'therapierten'" (also zu veruchen) also terrorisiert um das was offen steht, zu überschreiben und da z.B. der Offizier Urs Blum allenfalls mit sprangstoff aus militärbeständigen schützen das alle vorsätzlich ein. Allenfalls hat der Pfisterer die 1950er/1960er bereits versprochen dass die 1980er die 1950er/1960er vergewaltigen dürfen?? Pfisterer produziert mit m107 vorsätzlich Anköläfer
