

Action Recognition luck detection

<https://0x8.ch/HackersCardgame6>

Inventor: **xxxxxx**

If they have a 3D Model of your appartement, or your body, and additional an EEG implant (stimoceiver/Neuralink) that detects what stabilized your psyche and made you lucky the last 24h they have some sort of algorithm that loops all those scenes with an additional Pedophile 1960s Person that destroys this good scenes that stabilizes me. Maybe implemented as some sort of 3D Game that is created by the 1960s criminals and then given to a kid that plays it, so that the 1960s have an alibi.

Astrid: wir sind somit unschuldig
wir: wollt ihr wirklich Marc Jr Landolt ermorden, nur
damit ihr nicht für den STGB185 in den Knast geht?

Cyber fluorescent pen

<https://0x8.ch/HackersCardgame6>

Inventor: **xxxxxx**

I guess there is some sort of electronic fluorescent pen where the offender can mark things in text I wrote. The principle is quite simple, i guess one could make terror threat or a death threat out of every single page out of the bible if one would mark some words on the color. Not tested so far. Workaround would be to use color your own in the text you write, it then would still be possible, but much harder for those that uses this dirty trick.
Technically one could implement that with things like t1 card, or if you would know how many words a person reads per second you would for example send the word you would mark with a high frequency sound just above auditory threshold.. or you could add a blinking effect around the perceptual threshold, if done directly in the hardware, graphics card or even in the screen it would be quit hard to prove that. See also m85 Card

m84

<p>To force others to do your work (Pirates of the Caribbean II)</p> <p>https://0x8.ch/HackersCardgame6</p> <p>Inventor: XXXXX In <i>Pirates of the Caribbean 2</i> there is a scene where the lost pirates play for few years of service. This pirate is promoted also in the real world. To quote Jack: "The law is in favour for an oppressor that that is criminal". For example a criminal or a pedophile father that rapes his daughter and uses eg. his son as a scapegoat. (German: "Freundsprügelung"). This way the criminal father would win time to do more crimes while the scapegoat would be naked to the justice system, would face prison, mental institution and wastes a lot of his time. <i>m72 card makes this quite easy for the older people</i>. We guess the CIA suggested the combination of <i>m72 & m132</i> to all the older people and just a few could resist. The CIA owned people would support by other sinners and the CIA. With NSA BiData and 100 Years Data retention it's easy to blackmail and abuse them (<i>m74</i>). System is autopoietic, except the younger people can prove it, then the real criminal would end up in prison with much much more years of service. The old people would not hesitate to kill innocent whistleblowers (<i>m6</i>). Eg. the kids movie "Caesar" unfortunately even canonizes that. <i>So watch out for Parents that promotes or even forces</i> <i>co4 card</i>. It's not a real crime but it is some sort of satans starter kit</p>	m132	
<p>Commit suicide Jump now</p> <p>https://0x8.ch/HackersCardgame6</p> <p>Inventor: XXXXX On my balcony there seems to be an eventrigger that is shown on something like Stmocaviver or Neuralink: "Jump Now". To prime they run things like <i>JusPriniaeHocitis</i> (<i>m38</i>) and activate the Active Denial System (<i>t15</i>) or trigger my amygdala implant (<i>b1</i>). I often tried, but <i>I had luck so far, i not yet jumped</i>, but almost. They seem to train this habit with cards <i>t2, t11, t7, a16, m32, m44..</i> one could knwo when to start this algorithm with just positional data (eg. GPS, m60), if victim has body telemetry (2 RFID Chips or 2 resonant circuit in head / skull or retina CC (19)), they could even calculate what the victim is currently looking at to trigger this event (<i>t14</i>). Maybe fear or faith (<i>m57, m77</i>) of the victim is also added to this algorithm. If i have a spinalcord implant (<i>t6</i>) maybe this could affect it, but if this would be hacked i could not even prevent my death.</p>	m93	

Principles of Behavior

'Gleichschaltung' with GUI
at <https://0x8.ch/Hackerscardgame6>

what effect causes 1000 repetitions of closing the windows? its current task
you've been working for e.g. 1 hour when a single click on the right side to the Mind
make use of the following window:  **A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z**. Allowing everyone to do what they want... and
Based on the following window:  **D** Directly pointing to the 'Mind' - and
This is how you can do it:  **Q** Directly pointing to the 'Mind' - and
These are the 1000 repetitions you make you ARE the victim, because everybody
Based on this Stimulus you can propagate those **memories** everywhere

If you use <https://www.torproject.org> or <https://www.onionr.com> you can propagate those **memories** everywhere

Inventor:  **xxxxxx**

Formula from Clark Hull describing how programmable Response-Habits. Today it is possibly implemented in software. The sort of Deprivation or the Stimulus would maybe change randomly. The communication channel (11, t.. cards) are maybe randomized to, like SE-235 frequency hopping.

Psychological dimension: things like exposure time, for example 17 years torture or "white" torture after an initial m38 card would be important too.

This seems to be one of the main weapons from pfisterer and urs has the order to prevent innocent victims from leaking how to defend against this weapon.

the speaker is lying (stimulus-Reaction-Habit)

https://0x8.ch/Hackerscardgame6

Inventor:  **Carlo Collod**

With tons of bigdata you could easily say if someone is lying. Maybe there is already a system that does that function to help parents to teach their children well. This would need some Algorithms and some Technology cards and of course some programming language like Prolog. After a while the parents would trust into this stimuli and if the oldies kid would say, the **system is lying** but the stimuli that was trained in the parents head says **this is a lie**, the **system does not lie**, the parents would not believe that the system is broken or that the system is intentionally lying. Maybe a common problem among WhiteHat Hackers. But it became easier since good people like Manning or Snowden provided us with proof. What if Schizophrenic People have the same Problem, or at least some of them. **Workarounds**: switch from **Inductive reasoning** to **Deductive reasoning**

Card 1: GENIUSES WANTED

Inventor: **xxxxx**

Possibly the black world (also called Ecconomy) found out as early as 1999, that OpenSource movement or Creative Commons has the better ideas than people working for money. So it would be likely, that they tried to own young people that live in the Open Source Community. They let the young people do what they like, but if the young Nerd or She-Nerd has a good idea they steal the idea, claiming that the idea is their intellectual property. Even erasing the Nerd in Mental Institutions with drugs that he forgets about the fact that he initially invented it. As Open Source Community we **should have an eye on that.** Derivation of this Thesis can be found on <https://marchandoit.chmli.buzznet/2011/01/30/schamhaeboden-epilieren-beim-mann/> (sorry German). Maybe the "Linux: its a Marketing Problem" might be a overloaded Symbol (m69 card, several meanings) too.

Card 2: Morality

Inventor: **xxxxx**

Morality generally refers to the actual action patterns, conventions, rules or principles of individual individuals, groups or cultures. It would be better to say norms, values, categorical imperatives, which serve the general public as well as the individual, the counterpart to egoism. To keep the system stable and create sufficient reserves, so that it does not break, if something small goes wrong and / or become Sodom & Gomorra (Hebrew הַסּוֹדָם וְהַגּוֹמֹרָה).
