Sons have often problems with their fathers. Fathers often **bully their sons**, they abuse them, torture them, attack them (no matter if physically or verbally). After a while the son is old enough to defend himself, the justice system is normally not very interested in this things, but this causes the **sons to become evil**, maybe learned this behavior from their father, and are doing the same to younger people because they learned that it is legitimate to do this. In some cases the father would punish the oldest son (son1) even more because he does the same to the younger son (son2), unsure if just reason to **punish a weaker chief does** or really wants to protect the youngest. (Bigger Domain Model: Money beats m72 Card, m72 card beats unfortunately m24 card, maybe in conjunction with mso or mos2 card This behavior (psychology: projection) then would be the normal case and would feed problems into the whole social systems (also m102 karte) and finally hits also daughters too

sealing wax Glitter (Bomb)

old pedo Parents "need to control" what daughters write in their diaries, letters and of course they need to "control" the daughters sex toys - **just in the daughters interest**, that's what they claim, but in fact that sort of parents are pedophiles. Im at least 51% male but have similar issues, they render samples on objects in my apartment. They add Event triggers like: "The open bottle on your dining table was poisoned while you were away", they even render things on things in my bedroom. A workaround I found is **sealing wax**. If you **seal your appartement**, bedroom, server-case... before you leave, **they still render such things on your goods**, but if the seal isn't broken you know, they cheat and "just" render it on your goods (**Psychological Warfare**). The Loop "Neighbour Smith or Brother Dominic was it" would intentionally start a local conflict with a scapegoat that would distract from the real criminals. <https://www.youtube.com/watch?v=y0jATpdXm> **UPDATE:** one day after I released this card they added an eventtrigger on my door that distracts me to break the seal without checking. And drew some sealing wax into the elevator (PSYWAR). This would be another hint that the criminals are old people with a lot of time.

Ways to end up in Mental Institutions

Inventor: ??????

Year: ~????
There are many ways to end up in a mental institution. I guess peacefully painting is one of the ways.

Inventor: XXXXX

Year: ~????
It seems that they can identify the thoughts or words with the stimocover +70 years or the Neuralink. To get the map or at least to get used to an idea of your map of the content they use against you just think of random things (people, objects, sex toys,...) when they enabled the automated psychological warfare. So the system would transmit the objects, vocals and images linked to this specific keyword. Using paper and pencil to draw the map, even pre-printed templates or both simplifies this task.
So they still could enable it, but they would lose their psychological warfare, algorithms and of course "nobody" would leak them. **So we maybe have some sort of an Nash equilibrium.**

The brain automatically says: pain / injuries are bad. The brain tries to prevent the pony from situations where it feels pain again, so the scene that caused PAIN will be burned into the longterm memory and in the future automatically avoided (avoidance behavior)
Physical violence against children is prohibited by Swiss Law but unfortunately still very common. This effect is (ab)used in Behavioural "Sciences" = to boss people around for "efficiency" reasons instead of educating them. The consequences are often a PTSD that maybe can not be fixed at all. So it will continue to avoid the people that caused pain, but has probably no PTBS if it plays with equal aged Ponies.

Footprinting your own EEG Data to defend against m112/m113

Inventor: XXXXX

Year: ~????
If they want to make you believe in a lie they sent you eg. by Mail, Twitter or Facebook... there is some sort of pattern matching algorithm that then starts distributed over several channels Twitter, Google, Facebook, Mail...) making you believe in that lie. Since if your brain gets the same stimulus like the lie you initially got, it begins to **feel comfortable with that lie** and the possibility that it believe it is bigger. Here you see an example of an implementation with Jaro-Winkler algorithm, the same possibly works also with images, speech and videos. **Such an algorithm would definitely imply a big player like CIA/NSA.**
btw: Great visual representation of Jaro Winkler by the way!

induced "self injury"

Inventor: XXXXX

Year: ~????
After a traumatic event like death of someone in family or after a rape (or just m38 card) people often show the behaviour of "self injury". And if someone does self injury they can put him into a mental institution. In the mental institution he or she gets tons of "**antipsychotics**" that make stupid, lazy. If the victim is **whistleblower** or **whitehat hacker** that tries to show the public things that go wrong to fix those things putting the whistleblower in a mental institution would be **great for the offender**. Maybe they tell even play m41 card to make the group think the self injury is because of them, finally playing the dt1 to blackmail and silence the whole group. Workaround: just have plastic knives in your household. **There are victims that suffer much more (below my image)** than i, if you know her, have a good hart and are medically gifted **AND about the same age please help her.**

strapping psychiatric patients

Inventor: XXXXX

Year: ~????
Mental institution strapping psychiatric patients. I could verify that in 2007 **when they strapped me in Mental Institution Königsfelden, Aargau, Schweiz**. The good people in mental institutions they tell that it's just that the patient does not commit suicide. But in fact it is mindcontrol and torture, see sensory Deprivation. Worst case there are even shrinks that would rape strapped young female patients. If you google **Psycho-The-Rapist rapes patients** you would get 10100000 hits on google search. As we said on other cards, this normally just **obfuscates technology cards like t1, t28...** the sad fact is that if a patient (no matter if male or female) would have been raped in a mental institution he or she **will try to commit suicide the rest of his / her life**. We did not find a way to fix that behavior.

Stick (German: Peitsche)
